## The Estimates Documents

Each year, the government prepares Estimates in support of its request to Parliament for authority to spend public monies. This request is formalized through the tabling of appropriation bills in Parliament. The Estimates, which are tabled in the House of Commons by the President of the Treasury Board, consist of three parts:

**Part I – The Government Expenditure Plan** provides an overview of federal spending and summarizes the relationship of the key elements of the Main Estimates to the Expenditure Plan (as set out in the Budget).

**Part II – The Main Estimates** directly support the *Appropriation Act*. The Main Estimates identify the spending authorities (votes) and amounts to be included in subsequent appropriation bills. Parliament will be asked to approve these votes to enable the government to proceed with its spending plans. Parts I and II of the Estimates are tabled concurrently on or before 1 March.

**Part III – Departmental Expenditure Plans**, which are divided into two components:

- (1) **Reports on Plans and Priorities (RPPs)** are individual expenditure plans for each department and agency (excluding Crown corporations). These reports provide increased levels of detail on a business line basis and contain information on objectives, initiatives and planned results, including links to related resource requirements over a three-year period. The RPPs also provide details on human resource requirements, major capital projects, grants and contributions, and net program costs. They are tabled in Parliament by the President of the Treasury Board on behalf of the ministers who preside over the departments and agencies identified in Schedules I, I.1 and II of the *Financial Administration Act*. These documents are to be tabled on or before March 31 and referred to committees, which then report back to the House of Commons pursuant to Standing Order 81(4).
- (2) **Departmental Performance Reports (DPRs)** are individual department and agency accounts of accomplishments achieved against planned performance expectations as set out in respective RPPs. These Performance Reports, which cover the most recently completed fiscal year, are tabled in Parliament in the fall by the President of the Treasury Board on behalf of the ministers who preside over the departments and agencies identified in Schedules I, I.1 and II of the *Financial Administration Act*.

The Estimates, along with the Minister of Finance's Budget, reflect the government's annual budget planning and resource allocation priorities. In combination with the subsequent reporting of financial results in the Public Accounts and of accomplishments achieved in Departmental Performance Reports, this material helps Parliament hold the government to account for the allocation and management of public funds.

## The Expenditure Plan Overview

The Minister of Finance's Budget of February 28, 2000 sets out the government expenditure plan that amounts to \$158 billion. That plan includes \$116 billion of program spending, plus public debt charges of \$42 billion.

### Main Estimates

The 2000–2001 Main Estimates presents budgetary spending authorities totalling \$155.7 billion. This represents over 98 per cent of the expenditure plan in the Budget. The Main Estimates differ from the expenditure plan presented in the Budget in several ways:

- The Estimates do not include funds that are set aside in the expenditure plan for operating contingency purposes, or for new initiatives that either require Parliamentary approval through legislation, or require further planning and development before spending authority is sought from Parliament. The government will seek spending authority for such items either through separate legislation or through Supplementary Estimates over the course of the fiscal year.
- The expenditure plan in the Budget includes provisions for the revaluation of the government's assets and liabilities. These are intended to account for changes in the value of existing loans and investments, as well as adjustments to liabilities with respect to accumulated employee severance and vacation benefits and certain other statutory programs. The Main Estimates do not include such provisions.
- The voted appropriations in the Estimates represent a legal limit on the amount that a department can spend. As a result, there is often a gap between that limit and the amount actually spent – that difference is known as a lapse of spending authority. These lapses occur for a variety of reasons, some unavoidable, such as weather-induced delays on a construction project or the late delivery of goods and services which had been ordered and others reflecting management decisions. The expenditure forecast in the Budget takes this anticipated lapse into consideration.

# Part I – The Government Expenditure Plan

## Spending Authority

The Main Estimates present information on both budgetary and non-budgetary spending authorities. **Budgetary** expenditures include the cost of servicing the public debt; operating and capital expenditures; transfer payments to other levels of government, organizations or individuals; and payments to Crown corporations. **Non-budgetary** expenditures (loans, investments and advances) are outlays that represent changes in the composition of financial assets of the Government of Canada.

### Budgetary Spending Authority

These Main Estimates support the government's request for Parliament's authority to spend \$50.1 billion under program authorities that require Parliament's annual approval of their spending limits. The remaining \$105.6 billion, or 68 per cent of the total, is of a statutory nature and the detailed forecasts are provided for information purposes only.

### Non-budgetary Spending Authority

The 2000–2001 Main Estimates include a forecast increase in the value of loans, investments and advances of \$410 million. Voted non-budgetary spending authorities set out in these Estimates amount to \$31 million. The remaining \$379 million is pursuant to enabling legislation.

<b>Total Main Estimates</b>	<b>155,747</b>	<b>410</b>	<b>156,157</b>

Note: **Voted** expenditures are those for which parliamentary authority is sought through an annual appropriation bill.

**Statutory** expenditures are those authorized by Parliament through enabling legislation.

A more detailed break-down of these authorities by department and agency is presented in Part II of the Main Estimates.

# Introduction to Part II

## Structure of the Main Estimates

The purpose of these Estimates is to present to Parliament information in support of budgetary and non-budgetary spending authorities that will be sought through Appropriation bills. These authorities are divided into two categories – Voted and Statutory. Voted authorities are those for which the government must seek Parliament's approval annually through an Appropriation Act. The wording and expenditure authority attributable to each vote appears in a Schedule attached to the Appropriation Act. Once approved, the vote wording and approved amounts become the governing conditions under which these expenditures may be made. Individual expenditure proposals included in Votes seek authority to make expenditures necessary to deliver various mandates that are under the administration of a Minister and are contained in legislation approved by Parliament. Statutory authorities are those that Parliament has approved through other legislation that sets out both the purpose of the expenditures and the terms and conditions under which they may be made. Statutory spending is included in the Estimates for information only.

The basic structural units of **Part II** are the Votes and Statutory items that, in total, comprise the proposed expenditures under each departmental or agency program; a program being defined as a collection of activities having the same objective or set of objectives.

In general, the program and Vote structure correspond in that there is usually only one Vote for each program. The wording of a Vote and its amount are included in an Appropriation Act that provides the authority and the limit for payments to be charged against the Vote; it does not create a commitment to spend the entire amount. There are, however, certain exceptions to the normal Vote structure and these are discussed below.

The following kinds of Votes appear in Estimates.

- (a) *Program Expenditures Votes* – This type of Vote is used when there is no requirement for either a separate "capital expenditures" Vote or a "grants and contributions" Vote because neither equals or exceeds \$5 million. In this case, all program expenditures are charged to the one Vote.
- (b) *Operating Expenditures Votes* – This type of Vote is used when there is a requirement for either a capital expenditures Vote or a grants and contributions Vote or both; that is, when expenditures of either type equals or exceeds \$5 million. Where they do not, the appropriate expenditures are included in the program expenditures Vote.
- (c) *Capital Expenditures Votes* – This type of Vote is used when the capital expenditures in a program equal or exceed \$5 million. Expenditure items in a capital vote would include the acquisition of land, buildings and works (Standard Object 08), as well as the acquisition of machinery and equipment (Standard Object 09) where the item's value is expected to exceed \$10,000. Where a department expects to draw upon its own labour and materials, or employs consultants for purposes of creating assets, the expected outlays are also included in capital expenditures votes.
- (d) *Grants and Contributions Votes* – This type of Vote is used when the grants and contributions expenditures in a program equal or exceed \$5 million. It should be noted that the inclusion of a grant, contribution or other transfer payment item in Estimates imposes no requirement to make a payment, nor does it give a prospective recipient any right to the funds. It should also be noted that in the vote wording, the meaning of the word "contributions" is considered to include "other transfer payments" because of the similar characteristics of each.
- (e) *Non-Budgetary Votes* – This type of Vote, identified by the letter "L", provides authority for expenditures in the form of loans or advances to, and investments in, Crown Corporations; and loans or advances for specific purposes to other governments, international organizations or persons or corporations in the private sector.

## Introduction to Part II

- (f) *Special Votes: Crown Corporation Deficits and Separate Legal Entities* – The one Vote to one program concept does not apply where it is necessary to appropriate funds for a payment to a Crown corporation or for the expenditures of a legal entity where such expenditures are part of a larger program. Where this is the case, a separate Vote structure is established for each. A legal entity for these purposes is defined as a unit of government operating under an Act of Parliament and responsible directly to a Minister.
- (g) *Special Votes: Treasury Board Centrally Financed Votes* – To support the Treasury Board in performing its statutory responsibilities for managing the government's financial, human and materiel resources, a number of special authorities are required and these are outlined below.
  - (i) Government Contingencies Vote – This Vote provides funds to meet expenditures of a miscellaneous character which cannot be foreseen when the Estimates are developed, and to meet additional payroll costs such as those arising out of collective bargaining agreements that come into effect in the Estimates Year and which exceed the provision for these costs included in the individual Votes of departments and agencies.
  - (ii) Government Wide Initiatives Vote – This Vote supplements other appropriations in support of the implementation of strategic management initiatives in the public service of Canada including Employment Equity programs and Comptrollership Modernization.
  - (iii) Collective Agreements Vote – This Vote supplements other appropriations to provide funding for the increased personnel costs of collective agreements between the Treasury Board and collective bargaining units representing public servants as well as collective agreements signed by separate employers.
  - (iv) Public Service Insurance Vote – This Vote provides for the payment of the employer's share of health, income maintenance and life insurance premiums; for payments to or in respect of provincial health insurance plans; provincial payroll taxes; pension, benefit and insurance plans for employees engaged locally outside Canada; and to return to certain employees their share of the unemployment insurance premium reduction.

## Presentation by Ministry, Department and Agency

The programs for the departments and agencies for which a Minister is responsible, or reports to Parliament, are grouped together to provide a total ministry presentation. The ministries are then arranged alphabetically to make up the complete Main Estimates. Ministries of State, which may be formed under authority of the *Government Organization Act*, 1970, involve a more restrictive meaning of the term Ministry than that used here. Ministries of State are treated as departments for presentation purposes in these Estimates.

Each ministry presentation begins with a Ministry Summary table that shows, by Vote or Statutory item, the amount included in the Main Estimates for all programs comprising that Ministry. Abbreviated wordings are used in this table.

All Estimates data shown for the previous year are taken from the Main Estimates of that year. This ensures that all financial information is displayed on a consistent year over year basis. Where necessary, adjustments are made to the previous year amounts to reflect changes in organizational or program structure including changes in Ministerial responsibility, to provide a more relevant basis for comparison.

In general, the individual program presentation is made up of four sections, as explained below. Where a section is not appropriate to a particular program, it does not appear in the presentation for that program.

## Introduction to Part II

### *Objectives*

This section provides a statement of the Objectives of each program.

### *Business Line Description*

This section serves to explain the program by describing the work done in each business line as it contributes to the achievement of the program objectives.

### *The Program by Business Line Table*

This table shows the total financial resources proposed for the program. The amounts of Voted and Statutory authorities are combined and distributed across the business lines of each program. Expenditures for each business line are presented under the headings of Operating, Capital, Transfer Payments (Grants and Contributions), and Loans, Investments and Advances. Revenues credited to the Vote, for those departments and agencies authorized to do so, and revenues associated with Revolving Funds are also included in this table.

Receipts credited to general non-tax revenue and services provided without charge by other government departments are shown in the **Report on Plans and Priorities**.

### *Transfer Payments*

This table provides additional detail on the transfer payments proposed for the program. A transfer payment is a grant, contribution or other payment made for the purpose of furthering program objectives but for which no goods or services are received.

Grants, contributions and other transfer payments differ in several respects:

- i) contributions are conditional payments and subject to audit whereas grants are not;
- ii) contributions require an arrangement between the recipient and the donor identifying the terms and conditions governing their payment while grants do not;
- iii) other transfer payments are payments based on legislation or an arrangement which normally includes a formula or schedule of payments as one element used to determine the annual amount; and
- iv) the wording used in the Estimates to describe a grant has a legislative character, while that used for contributions and other transfer payments is informational.

### *Revolving Funds*

A Revolving Fund is a continuing or non-lapsing authorization by Parliament to make payments out of the Consolidated Revenue Fund up to a stipulated limit. As part of this authorization, expenditure requirements are offset, to the extent possible, by revenues generated.

Revolving Funds may be used to finance programs, business lines within programs or parts of business lines. The Program by Business Line table(s) have appropriate footnotes which disclose the expected operating income or loss, relate that balance to the Estimates' cash requirement and make reference to the **Report on Plans and Priorities** for further information.

## Introduction to Part II

### Crown Corporations

The general principle followed in **Part II** of the Estimates is to provide information related to operations being funded through appropriations, rather than on the corporate financial plan in its entirety. The Summaries of corporate plans and budgets, tabled separately, are intended to be the source of more detailed information for the use of parliamentarians in their review of Crown corporations' spending.

All Crown corporations for which appropriations are being requested have a separate presentation consisting of three standard sections:

- (a) *Objective* – This section describes the objective of the Crown corporation.
- (b) *Description of Funding through Appropriations* – This section outlines the major businesses and business lines for which funding through appropriations is needed. The section also describes major categories of expenses.
- (c) *Summary of Funding through Appropriations* – This table provides details of financial requirements to be met through appropriations. Formats may vary according to the circumstances of individual corporations and the form of disclosure adopted in their summaries of corporate plans and budgets and their annual financial statements. The presentation separates and identifies:
  - i) budgetary and non-budgetary funding according to the major business and business lines of the corporation;
  - ii) the amount of budgetary funding required for operating purposes, acquisition of fixed assets and other non-current assets; and
  - iii) the planned expenses, revenues and non-cash or other adjustments upon which the funding required for operating purposes is based.

### Standard Object of Expenditure

To determine and report more accurately the impact of government revenues and expenditures on the rest of the economy, the net amount of government purchases and sales by standard object must be determined. All departments, including those that use revolving funds, must charge their expenditures for purchases from outside the government to standard objects 01 to 12. Standard objects are the highest levels of object classification used for Parliamentary and executive purposes, and are reported in the Estimates and the Public Accounts.

**Budgetary estimates are distributed across the following Standard Objects of Expenditure:**

1. Personnel
2. Transportation and Communications
3. Information
4. Professional and Special Services
5. Rentals
6. Purchased Repair and Maintenance
7. Utilities, Materials and Supplies
8. Acquisition of Land, Buildings, and Works
9. Acquisition of Machinery and Equipment
10. Transfer Payments
11. Public Debt Charges
12. Other Subsidies and Payments

## Introduction to Part II

Information is also provided on Revenues credited to the vote. (In certain specific situations, Parliament authorizes departments or agencies to spend revenues generated from their operations in the same manner as any funds appropriated through that Vote. These amounts offset planned expenditures shown in Standard Objects 1 through 12, which are shown on a gross basis).

Changes in the government's financial information systems are bringing about changes in the content of the various Standard Objects. These changes took effect in a limited number of departments in 1999-2000, but are much more widespread this year. The main thrust of the change is in Standard Objects 8 and 9 in which reference to "construction" has been deleted.

A brief explanation of each Standard Object follows:

### 1. *Personnel*

Includes salaries and wages, overtime, severance pay, retroactive pay and other special pay of civilian continuing (full-time) or term (part-time, seasonal and casual) employees except those of agency and proprietary Crown Corporations, as well as members of the military and the RCMP. Also included are judges' salaries, those of the Governor General, the Lieutenant-Governors and the indemnities to Members of both Houses of Parliament, and all types of allowances paid to or in respect of continuing and term employees, such as Living, Terminable, Foreign Service, Isolated Post, and board and subsistence allowances, shift differential allowances for assistants, and other such allowances. In addition, it includes Ministers' Motor Car Allowances, and the Expense Allowances to Senators and Members of the House of Commons.

Also includes travelling and transportation of non-Government employees such as travel costs of veterans who are applicants for treatment or pensions.

Includes ordinary postage, airmail, registered mail, parcel post special delivery mail, post office box rentals, and any other postal charges. Also includes the expenditures for transportation of goods other than initial delivery cost on a purchase (which is included in the Standard Object covering the cost of the purchase itself) including charges for courier services provided by outside carriers. Includes all costs of telecommunication services by telephone, telegram, cable, teletype, radio and wireless communication (tolls, rates, etc.) and other communication costs such as courier services provided by outside agencies and communication services performed under contract or agreement.

Materials, supplies and other charges entering into the cost of such repairs undertaken by a department directly are coded to other objects, according to the nature of the purchase.

### 7. *Utilities, Materials and Supplies*

## Introduction to Part II

### 10. *Transfer Payments*

This category includes the major social assistance payments made to persons such as Old Age Security benefits and related allowances, Veterans' pensions and allowances; subsidies and payments to the provinces and territories under the Constitution Acts, the Federal-Provincial Fiscal Arrangements Act, the Canada Health and Social Transfer and for official languages; payments to Indians and Inuit in support of self-government initiatives, health, educational, social and community development programming and in respect of native claims; payments to the territorial governments pursuant to financing agreements entered into between the Minister of Finance and the respective territorial Minister of Finance; subsidies and capital assistance to industry; research grants and other assistance towards research carried on by non-governmental organizations; scholarships; sustaining grants to many national and international non-profit organizations; contributions to international organizations and assessments for membership in such organizations, such as the contribution to the International Food Aid Program and Canada's assessment for membership in the UN.

Most of the payments in this Object are identified in the Estimates Details as "Grants" or "Contributions". The former are not subject to audit and are therefore restricted by Parliament as to amount and recipient and often as to purpose; the latter are conditional and subject to audit and are not so restricted.

### 11. *Public Debt Charges*

Includes interest on the unmatured debt of Canada (including Treasury Bills) and on other liabilities such as trust and other special funds. It also includes cost of issuing new loans, amortization of bond discount, premiums and commissions, and the costs of servicing the Public Debt.

Payments made to non-budgetary accounts include the government contributions to agricultural commodities stabilization accounts as well as benefits under the *Veterans Land Act*.

Miscellaneous expenditures includes licences, permits and payments for dockage, towage, wharfage and mooring privileges; bonding of government employees, loss of personal effects, and expenditures for small miscellaneous articles and services. Also included are many small items and services that do not lend themselves to identification under specific headings detailed in this summary.

### *Revenues Credited to the Vote*

Revenues that are credited to the Vote in accordance with Parliamentary authority include a combination of revenues from external and internal sources. Revenues from external sources include: rentals received on government-owned buildings and equipment; receipts from the provision of police services to other levels of government; receipts of revolving funds as a result of transactions with parties outside the government; as well as recoveries of costs from provincial governments and other national governments. Revenues from internal sources include recoveries of costs of goods or services provided by one organization to another and the proceeds of sales by revolving funds to parties internal to government.

## Changes in 2000-2001 Main Estimates

The purpose of this section is two-fold. As in previous years, it will describe changes in Vote, Program and other presentations in order to permit the reconciliation of the 2000-2001 Main Estimates with the 1999-2000 Main Estimates. In addition, this section will detail those Votes that contain specific authority that differs from that included in the previous year's Main Estimates as well as new expenditure authorities appearing for the first time. In light of the House of Commons Speaker's rulings in 1981, the government has made a commitment that the only legislation that will be amended through the Estimates process, other than cases specifically authorized by Statute, will be previous Appropriation Acts.

### Changes to Government Organization and Structure:

# Agriculture and Agri-Food Canadian Dairy Commission

## Objectives

To provide efficient producers of milk and cream with the opportunity of obtaining a fair return for their labour and investment and to provide consumers with a continuous and adequate supply of dairy products of high quality.

## Description of Funding Through Appropriations

### *Administration and Operations*

The Canadian Dairy Commission has the authority to purchase, store, process and dispose of dairy products; to make payments to milk and cream producers for the purpose of stabilizing the price of industrial milk and cream; to investigate matters relating to the production, processing or marketing of any dairy product; to help promote the use of dairy products; and to receive funds for the administration and management of its programs. The Canadian Dairy Commission calculates support prices at which it will purchase butter and skim milk powder. These prices are used as a reference at the provincial level in pricing components sold to processors. The Commission works in close cooperation with the provinces through its chairmanship and technical support of the Canadian Milk Supply Management Committee, a government/industry body which coordinates the supply management of industrial milk and cream on a national basis.

The Commission's marketing and administrative costs are funded by the Government of Canada, producers and the marketplace.

The Commission administers the federal government's monthly subsidy payment to eligible producers. On behalf of the industry, the Commission exports mainly butter, evaporated milk and milk powders on a government to government basis and assists in the administration of marketing programs such as the Domestic Dairy Product Innovation Program, and the Optional Export Program. The Commission is also responsible for the expenses of the Commissioners and of a support staff of seventy employees needed to manage its activities on behalf of the dairy sector.

On behalf of producers, the Commission administers the Class 5 Milk Permit and Pooling System.

The CGC's programs and functions aim to:

- result in shipments of grain that consistently meet contract specifications for quality and quantity, are safe and meet tolerances for toxic contaminants, to enhance grain marketing
- provide a better understanding of the grain qualities required by end users, and how these qualities can be measured; to adapt to new technologies and changing markets
- maintain grain quality as it moves through the marketing channels; ensure fair treatment of grain producers; and ensure the integrity of grain transactions
- meet the needs of producers and other members of the grain industry in the most efficient and effective manner possible.

# Canadian Heritage Canadian Broadcasting Corporation

## Objectives

To develop and provide a national broadcasting service for all Canadians in both official languages, in television and radio, and be primarily Canadian in content and character.

## Description of Funding Through Appropriations

The main business lines of the Corporation in the attainment of its objectives are set out below.

### *Television and Radio Service Costs*

This business line includes all main broadcasting services, whether radio or television, French or English, national, regional, or local. It embraces:

- the planning of individual broadcasts and the broadcast schedules;
- the procurement of programs from other production agencies;
- in-house production of programs;
- services provided on a self-funded or contractual basis such as Radio Canada International, Galaxie, CBC Newsworld and Réseau de l'information;
- operational management services provided at the various production/transmission centres such as program supervision, program research, engineering, human resources, financial and administration services, and local management;
- the sales and marketing effort to sell CBC programs and commercial air time. This includes commissions to sales representatives and costs related to program sales.

### *Transmission, Distribution and Collection*

The distribution of the national broadcasting service to all possible parts of Canada through the Corporation's or privately-owned outlets. The methods of delivery include satellite, microwave and landlines. Included in this business line is the provision of the signal that delivers the service to the individual radio and television receivers through CBC-owned transmitters, payments to privately-owned affiliates carrying CBC programs, and facilities to delay or pre-release broadcasts as required in the different time zones throughout the country.

### *Corporate Management*

Those functions which must be discharged on a corporate basis are included in this business line. These include executive direction; policy and standards formulation; strategic planning and external relations.

### *Amortization of Capital Assets*

This represents the annual amount recorded for the amortization of CBC's capital assets. Amortization is calculated on a straight-line method using rates based on the estimated useful life of the assets.

This is not an item requiring operating funds since the CBC receives separate funding for its capital expenditures. The amortization of capital assets however, is reported separately strictly for accounting purposes as required by generally accepted accounting principles (GAAP). Consequently, this expenditure is included in "items not requiring current operating funds" and is deducted in determining CBC's total operating requirements for the year, on a government funding basis.

### *Revenues*

## Objectives

The corporate level strategic objectives of the Public Service Commission (PSC) are within its legislative mandate to assist in providing Canadians with:

- a highly competent, non-partisan, professional Public Service appointed on the basis of merit;
- a representative Public Service workforce;
- a Public Service which understands and is able to apply democratic, ethical, and professional values;
- a Public Service which builds on its competencies through development and continuous learning;
- the recognition and sustaining of a non-partisan public service as a cornerstone of the governance system; and
- a PSC which is an independent champion and steward of the principles of a professional Public Service, in the public interest.

## Business Line Descriptions

### *Resourcing*

The Resourcing business line encompasses activities in support of delegated and non-delegated staffing. These activities are program development, administration of staffing delegation, establishment of tests and standards for selection, administration of staffing priorities, recruitment and promotion, and diversity and employment equity initiatives. The business line also includes resourcing, exchanges and development programs for the Executive Group.

In addition, the business line is responsible for the delivery of the employment equity initiatives and corporate development programs on behalf of Treasury Board.

### *Learning*

The Learning business line is composed of two main service lines: language training and professional development for non-executives.

Language Training assesses the potential for success of employees who are eligible for language training; provides mandatory and discretionary language training in both official languages and related orientation, and language training services. It provides for the development and design of second-language courses and tools to meet the job-related linguistic requirements of departments and a range of advisory, informational and co-ordinating services related to language training.

The PSC provides a range of learning products and services to key communities such as policy analysts, middle-management and supervisors, human resources specialists, comptrollership, communications analysts and others. The emphasis is on corporate learning messages (such as the machinery of government and values and ethics) and on products unique to government learning, not on work specific training which is the responsibility of departments. The PSC provides training services in both official languages to federal public servants across Canada in response to Treasury Board policies and departmental demands.

As the PSC repositions, its focus on learning will shift to a more strategic use of resources, concentrating on the design and development of new learning products and services, which respond to the strategic directions of the Treasury Board Secretariat Advisory Committee (TBSAC), and a second order governance structure, the Learning Advisory Panels for each strategic professional community.

In support of this role, the business line will also enhance and co-ordinate the knowledge base of the PSC. The activities of the business will supply strategic information to the Commission and ultimately to Parliament (via the PSC's annual report) through the monitoring, assessment and review of PSC programs and policies and through the monitoring of the health of the Public Service in the areas related to the PSC's mandate.

Functions related to outreach, such as reporting to Parliament, the government and its central agency advisors on PSC matters at a strategic level, liaison and information sharing between provincial, federal, and international policy actors in areas related to the mandate and delegated responsibilities of the Public Service Commission, will be carried out through the Policy, Research and Outreach business line.

## Immigration and Refugee Board of Canada

### Objectives

The Board's objective is to meet Canada's immigration and refugee related obligations as defined in the *Immigration Act* and as a signatory to the *1951 United Nations Convention Relating to the Status of Refugees* and the *1967 Protocol to the Convention*. It does this by: determining claims to Convention refugee status made by persons within Canada; hearing appeals of certain persons who have been denied admission to or have been ordered removed from Canada; hearing appeals from Canadian citizens and permanent residents whose family members have been refused permanent resident status in Canada; hearing appeals from the Minister of an adjudicator's decision; conducting inquiries involving persons alleged to be inadmissible to or removable from Canada; and conducting detention reviews for persons detained for immigration reasons.

### Business Line Descriptions

#### *Refugee Determination*

The Refugee Determination business line fulfils Canada's obligations as a signatory to the *1951 United Nations Convention Relating to the Status of Refugees* to protect those with a well-founded fear of persecution in their own country. It does this by hearing and deciding claims for refugee status made within Canada. Refugee determination at the Immigration and Refugee Board deals exclusively with claims to refugee status made by persons who have arrived in Canada.

#### *Immigration Appeals*

The Immigration Appeals business line makes available to persons who have been denied admission to or ordered deported from Canada, as well as to Canadian citizens and permanent residents whose family members have been refused landing in Canada, a quasi-judicial tribunal to which they may appeal. This is done by hearing appeals of refusals of sponsored applications for permanent residence, appeals against removal orders issued against permanent residents, persons found to be Convention refugees or by persons in possession of valid visas and appeals of the Minister of an adjudicator's decision to grant admission or not to order removal.

#### *Inquiries and Detention Reviews*

The Inquiries and Detention Reviews business line contributes to ensuring the safety of Canadian society by conducting inquiries on persons seeking admission at a Canadian port of entry believed to be inadmissible or persons in Canada believed to be removable; and by conducting detention reviews for persons who have been detained during the examination, inquiry or removal process.

#### *Corporate Management and Services*

The Corporate Management and Services business line provides the Board with efficient management processes and administrative services.

# Fisheries and Oceans

## Objectives

The objective of the Program is to undertake policies and programs in support of Canada's economic, ecological and scientific interests in the oceans and inland waters; to provide for the conservation, development and sustained economic utilization of Canada's fisheries resources in marine and inland waters for those who derive their livelihood or benefit from these resources; to provide safe, effective, and environmentally sound marine services responsive to the needs of Canadians in a global economy; and to coordinate the policies and programs of the Government of Canada respecting oceans.

## Business Line Descriptions

### *Marine Navigation Services*

Marine Navigation Services provides, operates and maintains a system of aids to navigation, provides waterways development and maintenance, and ensures protection of the public right to navigation and protection of the environment.

### *Marine Communications and Traffic Services*

Marine Communications and Traffic Services provides distress and safety communications and coordination, vessel screening to prevent entry of unsafe vessels into Canadian waters, regulation of vessel traffic movements, and management of an integrated system of marine information and public correspondence services. In addition to ensuring safe marine navigation, Marine Communications and Traffic Services (MCTS) supports economic activities by optimizing traffic movements and port efficiency, and by facilitating industry ship/shore communications. All of the functions are derived from a regulatory framework based primarily on the *Canada Shipping Act* and the Safety of Life at Sea Convention.

### *Icebreaking Operations*

Icebreaking Operations are those activities such as icebreaking escort, channel maintenance, flood control, harbour breakouts, and ice routing and information services for marine traffic navigating through or around ice-covered waters, and for the general public. It also coordinates the movement of cargo for the annual resupply of Northern settlements and military sites using contracted commercial carriers.

### *Rescue, Safety and Environmental Response*

Rescue, Safety and Environmental Response (RSER) is composed of the following major program areas: marine search and rescue (SAR); environmental, response and departmental national emergency preparedness; and the promotion of boating safety to the marine public through prevention and regulation.

### *Fisheries and Oceans Science*

Marine ecosystems are monitored and assessed through research vessel surveys, monitoring of fisheries and cooperative programs with fishers. Measurements of ocean parameters such as temperature, salinity, water levels and wave heights come from many sources within and outside the Department. Scientists work in multidisciplinary teams with collaboration of fishers and university based scientists to assess fish stocks in a broader ecosystem and environmental context. Climate-related studies focus on the effects of climatic changes in the ocean on fish species such as cod and salmon and the role of the oceans in the world climate system.

Aquaculture science is focused on making new fish species viable for culture in Canada and improving the efficiency of culture of existing species. The introduction and spread of fish diseases to wild and cultured stocks is combatted through fish health protection regulations requiring certification of fish production facilities before fish may be transported from such facilities into Canada or across provincial boundaries.

# Fisheries and Oceans

## *Habitat Management and Environmental Science*

This business line develops and implements policies, plans and programs and administers statutes related to the protection and conservation of aquatic habitats and the environment. It also involves investigating and monitoring chemical and physical conditions which affect the quality of aquatic environments as well as the collection, analysis and interpretation of information to support the sustained economic utilization of Canada's renewable aquatic resources and to assess, approve and monitor activities which affect the quality and quantity of fish habitat.

## *Hydrography*

Hydrographic surveys measure the parameters necessary to describe the precise nature and configuration of the seabed and the floors of inland navigable waters, their geographic relationship to the landmass and the characteristics and dynamics of these waters. Parameters measured include: water depth, bottom type, near surface currents, tides, and water levels. Data collected are published as navigational charts and other publications such as Tide and Current Tables, Sailing Directions, Small Craft Guides, and Water Level Bulletins. Hydrographic information is also used for the determination of the seaward limits of national jurisdiction and the delimitation of maritime boundaries.

## *Fisheries Management*

Fisheries Management is responsible for fisheries management functions in all provinces and territories in Canada, and within and adjacent to Canada's 200-mile fisheries zones. This includes the inland river systems and lakes in all provinces, except where authority for the management of inland fisheries has been delegated to the province or territory. This includes management in Canadian portions of transboundary rivers, shared management of interception fisheries in international waters and management of the Aboriginal, recreational and commercial fishing effort in Canadian coastal waters. Fisheries Management is also responsible for negotiating international arrangements to advance Canada's fisheries conservation interests in cooperation with other Government departments, and the negotiation and administration of international treaties and agreements affecting bilateral and multilateral fisheries relations with other countries.

The objectives of Fisheries Management are complemented through the delivery of capacity-reduction programs such as the Canadian Fisheries Adjustment and Restructuring (CFAR) Plan, the Atlantic Groundfish Strategy (TAGS) and the Northern Cod Adjustment and Recovery Program (NCARP). These special programs address specific needs for a specified period of time.

## *Harbours*

The operation and maintenance of a national system of fishing and recreational harbours involves the construction and upkeep of wave protection structures and boat mooring and launching facilities as well as the dredging of harbour channels and basins to an adequate water depth. Additional activities include the provision and maintenance of service areas and equipment for fish and gear handling and various onshore services. Program management, including engineering and technical services, is provided regionally under national policy direction, with ongoing harbour management and administration, where applicable, provided locally.

## *Fleet Management*

Fleet Management consists of the acquisition, maintenance, and scheduling of the Department's vessel and air fleets in support of the following program areas: Marine Navigation Services, Marine Communications and Traffic Services, Icebreaking Operations, Rescue, Safety and Environmental Response, Fisheries Management, Fisheries and Oceans Science, and Hydrography. The funding to crew and to operate the Fleet is provided by the above program areas. Fleet Management also arranges for any augmentation of fleet capabilities by arranging for other government departments and the private sector to provide additional sea and air support to the programs.

## *Policy and Internal Services*

The responsibilities of Policy and Internal Services include: executive direction of the Program, corporate and regional management, provision of administrative services, coordination of departmental policies, programs, and development and promulgation of the Department's national regulations.

## Canadian International Development Agency

### Objectives

To facilitate the efforts of the peoples of developing countries and countries in transition to achieve self-sustainable economic and social development in accordance with their needs and environment, by co-operating with them in development activities; and to provide humanitarian assistance thereby contributing to Canada's political and economic interest abroad in promoting social justice, international stability and long-term economic relationships, for the benefit of the global community.

### Business Line Descriptions

#### *Geographic Programs*

Geographic programs involve direct contacts between the Government of Canada and recipient countries and are developed through consultation and co-operation with partners in these countries. They are the main assistance instrument directly available to the Government to invest, over the long-term, in areas critical to sustainable development. In all, geographic programs account for about one-third of the international assistance budget.

Projects supported through the geographic programs reflect both the needs of developing countries and Canada's ability to meet these needs. These projects, as well as the contracts and contribution agreements required for their delivery, range in value from thousands to tens of millions of dollars and can vary considerably in their approach and subject matter. With few exceptions, geographic programs are delivered in kind directly by Canadian suppliers and executing agents or under recipient country procurement – all within the framework of Canadian tied aid policies (funds allocated for the procurement of goods and services in Canada) and on Canadian content requirements.

Three geographic branches – Africa and the Middle East, Asia and Americas – are responsible for planning and providing Canada's country-to-country Official Development Assistance to eligible recipients. Programming in these regions is based on the ODA purpose statement and the 6 program priorities.

#### *Countries in Transition*

The Central and Eastern Europe (CEE) program is highly responsive and designed to assist countries in the region during a critical time of transition. A small share of the assistance provided through this program is considered ODA. The CEE program transfers knowledge and expertise to countries in the region through human resource development, institution-building, humanitarian and multilateral assistance, as well as policy advice. Initiatives supported by the program are delivered in partnership with the private sector, non-governmental organizations (NGOs), academia, ethnic communities and all levels of Canadian government. These partnerships enable the program to leverage project contributions from Canada and recipient country partners.

#### *Multilateral Programs*

Multilateral programs involve Canadian International Development Agency (CIDA) in the work of a very wide range of international organizations and institutions. These include the UN and its agencies – such as UNICEF – the Commonwealth, la Francophonie and the regional development banks for Africa, Asia, Latin America and the Caribbean. Most of CIDA's humanitarian assistance and emergency aide is also provided through the multilateral program.

CIDA's multilateral programming seeks to achieve results in the 6 priority areas in a number of ways. Along with other donor countries, CIDA provides core funding to multilateral organizations and institutions working in these areas. CIDA also seeks to influence the policies and practices of these bodies to maximize the effectiveness of their programming and operations. In addition, the multilateral program monitors, assesses and reports on the performance of international organizations and institutions.

Multilateral Branch also works towards results related to improvements in the general policies and practices of multilateral institutions, particularly in such areas as country-level coordination, field-delivery supervision and evaluation. Improving the effectiveness of international organizations is an important element of the multilateral program.

## Canadian International Development Agency

### *Canadian Partnership*

The Canadian Partnership program provides grants and contributions to Canadian and international organizations to support their activities in developing countries. This funding is responsive to the initiatives of these organizations (profit and non-profit), and emphasizes the development of sustainable partnerships between developing countries and Canadian society through the cost-sharing of projects. Canadian Partnership also manages CIDA's consultation policy and is the key interface for the Agency in external relations and consultations with its development partners.

The Canadian Partnership Program comprises three main sub-programs: Industrial Cooperation, Voluntary Sector and Scholarships. The Industrial Cooperation Program (INC) promotes economic growth and private sector development in developing countries by responding to Canadian private sector initiatives to establish mutually beneficial, long-term ties between Canadian and developing country partners.

The Voluntary Sector program focuses on grass-roots development and seeks to increase the capacity of organizations and institutions in developing countries to promote sustainable development in key socio-economic areas. The program has a strong emphasis on improving linkages between Canadian and developing country NGOs and also supports Canadian organizations and institutions working in such areas as the environment, public sector reform, human rights, democracy and good governance to promote technology transfer and capacity building.

The Scholarships program administers various fellowship and awards programs, as well as regulations and policies governing the selection and recruitment of technical assistance cooperant/experts and in-country trainees.

### *Policy*

Policy Branch formulates and maintains CIDA's policy base within the context of the ODA purpose and priorities and Canada's broader foreign policy objectives and interests. It provides advice, information and briefing materials on policy matters and strategic issues to the Minister, CIDA and other government departments, as well as specialised expertise on scientific and technical areas. In certain cases – e.g., environmental assessment – Branch experts verify Agency compliance and legislation. The Branch also manages consultations on policy matters with special interest groups and the general public.

Policy Branch also takes the lead on the management of the International Assistance Envelope and allocations on behalf of CIDA. It houses the Agency's library and document collections, as well as numerous national and international databases, and produces corporate information required to meet national and international responsibilities for reporting on ODA expenditures.

At the international level, Policy Branch seeks to improve the coordination of Canadian development policies with those of other donor countries – for example, through the Development Assistance Committee of the Organization for Economic Cooperation and Development (OECD). Policy Branch also helps to represent Canada's interests in international fora and verifies that international commitments undertaken by this country are reflected in Canadian development policies.

### *Communications*

In keeping with government communications policy, Communications Branch provides support to the Minister, President and CIDA branches to help them fulfill their responsibilities in this area. This support is provided as expert advice, media relations and analysis, public opinion research and in the form of printed and audio-visual materials.

Through its communications efforts, CIDA seeks to demonstrate to selected key publics, including youth, decision makers and opinion leaders, that it is an effective aid agency. It promotes greater awareness of international development and its impact and strengthens communications cooperation with domestic and international partners. Communications Branch is also responsible for implementing the Agency's internal communications policy.

Through the Development Information Program (DIP), Communications Branch works in partnership with non-governmental and private sector organizations and individuals to inform Canadians about development programs and issues, with a special emphasis on the important role and contributions Canadians make in developing countries.

# Foreign Affairs and International Trade Canadian International Development Agency

## *Corporate Services*

The Corporate Services activity provides the Agency with support services that are not specific to any individual channel of program delivery. These services are rendered by the Agency Executive, the Human Resources and Corporate Services Branch and the Performance Review Branch. The costs of these services are classified as indirect administration, as opposed to direct administration which can easily be identified with a particular channel of delivery.

## Hazardous Materials Information Review Commission

### Objectives

To allow suppliers or employers involved with hazardous industrial materials to protect confidential business information concerning their products and at the same time to ensure that workers are provided with accurate safety and health information for these products.

### Business Line Descriptions

#### *Material Safety Data Sheet Compliance*

This business line contributes to the right of workers to know about the health and safety hazards of exposure to chemicals found in products associated with claims for exemption by ensuring that Material Safety Data Sheet (MSDS) and labels are compliant with Workplace Hazardous Materials Information System (WHMIS) requirements. This includes an assessment of the scientific information relevant to each of the product's ingredients and advice on the health and safety hazards posed by the product pursuant to the *Hazardous Products Act*, the *Canada Labour Code*, and provincial and territorial occupational health and safety legislation. Where non-compliance is found, a formal order for revision of the MSDS is issued and follow-up done to ensure compliance.

This activity will continue to result in a direct contribution to the reduction of workplace-related illness and injury which, in turn, has the effect of easing economic pressures due to compensation claims and health care costs.

#### *Client Services*

The responsibilities within this area include the formal registration of claims for exemption, the issuance of Registry Numbers, the security of claim-related information and the issuance of a decision on claim validity pursuant to the *Hazardous Materials Information Review Act*. In addition, Client Services provides general advice and guidance to claimants and monitors levels of client satisfaction.

#### *Dispute Resolution*

This business line includes the convening of independent tripartite boards to hear appeals or disputes from claimants or affected parties in order to address issues or disputes as early and effectively as possible.

An appeal may relate to the compliance of an MSDS, the rejection of a claim or to a request that confidential business information be disclosed in confidence to an affected party for occupational safety and health reasons.

Dispute resolution options such as mediation or facilitated discussion, will be implemented in a manner that is cost-effective and fair to everyone involved.

## Patented Medicine Prices Review Board

### Objectives

To protect consumer interests and to contribute to Canadian health care by ensuring that prices charged by manufacturers of patented medicines are not excessive.

### Business Line Descriptions

#### *Patented Medicine Prices Review Board*

The Patented Medicine Prices Review Board (PMPRB) gathers information on the prices charged by manufacturers of patented medicines in Canada, analyzes that data and takes action, when required, to reduce prices which are, in the opinion of the Board, excessive. Price reductions are accomplished through:

- voluntary action taken by the patentees;
- formal Voluntary Compliance Undertakings (VCUs) to lower prices and offset excess revenues; or,
- following a public hearing in which prices are found to be excessive, through the issuance of remedial orders.

The PMPRB relies on voluntary compliance wherever possible since it is more effective, less time consuming, and less costly to all parties. Voluntary compliance by patentees is facilitated by published Guidelines intended to assist companies in setting prices that are not excessive.

Under the *Patent Act*, the Board is required to consider the prices of medicines in other countries, the prices of other medicines in the same therapeutic class, changes in the Consumer Price Index (CPI), and other factors when assessing whether or not the price of a medicine is excessive. The Act allows the Minister of Health, in consultation with provincial ministers of health and others, to make regulations regarding additional factors the Board shall take into consideration in determining if a price is excessive and to assign additional duties and powers to the PMPRB. Furthermore, it authorizes the Minister of Health to require the Board to conduct inquiries into matters as determined by the Minister.

The PMPRB also reports to Parliament on the price trends of all medicines and on the ratio of pharmaceutical research and development expenditures to sales for the patented pharmaceutical industry and individual patentees in Canada.

## *Human Resources Development Program*

### **Objectives**

The objective of Human Resources Development Canada is to enable Canadians to participate fully in the workplace and the community.

### **Business Line Descriptions**

#### *Human Resources Investment (HRI)*

This business line focuses on:

- promoting transition to, attachment to and re-integration into the labour market;
- increasing private and voluntary sector capacity to promote human development;
- promoting learning and skills development; and
- promoting social inclusion to enable full workplace and community participation by all, with special emphasis on children, youth at risk, older workers, Aboriginal and people with disabilities.

These will be realized, in part, by taking an integrated and horizontal approach to human development and emphasizing preventative measures such as the development and strengthening of HRDC's partnerships with the private and voluntary sectors.

The HRI business line includes grants, contributions, loan and statutory programs and a range of information, coordination and advisory services designed to deliver high quality programs and services. HRI activities are designed to enable Canadians to learn, to manage transitions in their lives and to build capacity by helping individuals, businesses, communities, industrial and occupational sectors to identify, address and manage their human, social and labour market development needs.

Access to information, learning skills development, employment opportunities, job creation, and labour market information may be provided by HRDC, or through partnerships with provinces and territories, Aboriginal, private sector or community-based organizations. Financial assistance may also be made available for individuals to pursue their human development goals.

#### *Employment Insurance Income Benefits (EIIB)*

This business line focuses on the administration of the EI Program including the processing of Appeals, issuance of Social Insurance Numbers and administration of the Social Insurance Registry and the delivery of Government Annuities payments.

#### *Labour*

This business line includes four service lines:

Industrial Relations assists in resolving disputes involving employers, unions and workers under federal jurisdiction, supporting and funding collaborative labour-management initiatives on workplace issues, and researches current and emerging industrial relations priorities.

Labour Operations encourages client acceptance of, and responds to non-compliance with, federal mandatory and legislated programs designed to bring about fair, safe, healthy and equitable work environments.

Federal Workers' Compensation ensures, through administrative arrangements with provincial workers' compensation authorities, the provision of statutory employment injury and related claim benefits to eligible persons.

Legislation, Policy Research and Management develops policies and legislation that respond to the emerging needs of workers and employers, and the changing nature of the workplace and society; improves cooperation on labour issues with unions, business, and governments in Canada and internationally; and researches, provides and promotes access to workplace information.

# Industry Department

## Objectives

To promote international competitiveness and excellence in industry, science and technology in all parts of Canada, to promote regional economic development in Ontario, to assist Aboriginal people to realize their economic potential, to promote fair and efficient operation of the marketplace in Canada, and to establish the rules of the marketplace and ensure that they are effectively implemented and enforced.

## Business Line Descriptions

### *Micro-Economic Policy*

This Business Line sets the overall priorities and direction for the department's micro-economic agenda in the "four pillars" of marketplace climate, trade, technology and infrastructure, outlined in the government's framework document, "Building a More Innovative Economy (BMIE)" and consistent with the Speech from the Throne priorities. The major challenge in developing the micro-economic policy agenda will be to identify the key emerging issues, to marshal the analytical evidence for the appropriate policy responses and engage the commitment of a diverse group of departments and agencies inside and outside the Industry Portfolio in implementing them. The challenge must also include integrating a sustainable development strategy and sustainable development concepts into the work of the department.

### *Marketplace Rules and Services*

The department's Marketplace Rules and Services Business Line represents a significant portion of the government's policy levers for maintaining an efficient and equitable marketplace, thus enhancing Canada's attractiveness for investment. Some 20 Acts set out the policy and legislative framework for the marketplace in such areas as bankruptcy, corporations and corporate governance, approval and inspection of measuring devices, intellectual property, competition, consumer product inspection and voluntary codes of practice, and spectrum licensing and monitoring.

Through this Business Line, Industry Canada develops, evaluates and revises rules, regulations and standards that govern the fair, efficient and competitive operation of the Canadian marketplace. These rules support and interpret marketplace legislation that is developed as part of the Service Line related to promoting a healthy marketplace climate in the Micro-economic Policy Business Line.

Under Marketplace Rules and Services, the department maintains consumer and business confidence by effectively administering and ensuring compliance with marketplace legislation, rules, regulations and standards. It also promotes these marketplace standards internationally to help Canadians compete more effectively in global markets.

The organizations that make up this Business Line also help businesses and consumers contribute to and benefit fully from marketplace rules and respond better to changing conditions by providing a wide range of marketplace information and services.

Included within this business line is the Canadian Intellectual Property Office Revolving Fund. Parliament has authorized a total drawdown of \$15,000,000 for the Canadian Intellectual Property Office Revolving Fund effective April 1, 1997. The projected use of this authority as related to these Estimates is as follows:

	(thousands of dollars)
Anticipated unused authority as of April 1, 2000	27,451
Plus:	
2000-2001 Main Estimates – surplus	5,001
Anticipated unused authority as of April 1, 2001	32,452

# Industry Department

## Industry Sector Development

The department's Industry Sector Development Business Line provides leadership and support to Canadian industry as it adapts to the challenges and opportunities of the global economy. This is accomplished through the development and implementation of strategies in cooperation with major partners and stakeholders for the advancement of trade, investment, technology, youth opportunities, information technology and telecommunications and human resource development. In addition, world-class information products and services will address the needs of Canadian industry. Policies, regulations and research will support Canada's information technology and telecommunications industry and targeted financial assistance will promote investment and leading edge technologies.

## Tourism

The Canadian Tourism Commission (CTC) is a working partnership between tourism industry businesses and associations, provincial and territorial governments and the Government of Canada. The CTC has authority to plan, direct, manage and implement programs to generate and promote tourism in Canada. As a Special Operating Agency (SOA), it is an example of the new partnership model of the federal government. It is made up of industry representatives from across Canada acting to ensure that the tourism industry remains a vibrant and profitable part of the Canadian economy.

## Corporate and Management Services

This Business Line encompasses the provision of corporate services, including management advisory services and strategic communication products and services direction, human resources and corporate development services, financial, administrative and common services and fulfils the functions of the Ethics Counsellor.

## Canadian Space Agency

### Objectives

The overriding objectives of the Canadian Space Program are summarized as:

- the development and application of space science and technology to meet Canadian needs; and,
- the development of an internationally competitive space industry in Canada.

### Business Line Descriptions

#### *Space Knowledge, Applications and Industry Development*

The Canadian Space Agency works with universities and industry across Canada to contribute to and facilitate the advancement of space knowledge; the development of new processes, technologies and applications; and the use and application of space science and technology. This leads to an internationally competitive, export-oriented Canadian space equipment and services sector. In collaboration with other public sector organizations, or on its own, the Canadian Space Agency contributes to the sustainable development of Canada by linking Canadians from coast to coast, by enhancing the management of our environment and natural resources, and by learning how phenomena in space affect life on Earth.

The business line creates better awareness of the importance of space technology in all regions of Canada and improves cooperation and relationships with space sector organizations throughout the world. The business line also involves all initiatives that ensure that the Agency performs its role as the leader of the Canadian Space Program.

## Business Line Descriptions

### *Economic and Social Statistics*

The Economic Statistics component of this business line provides information and analysis on the entire spectrum of Canadian economic activity, both domestic and international, through a set of macro-economic statistics. The organization of economic statistics is guided, in a large measure, by frameworks which constitute the Canadian System of National Accounts. The system makes it possible to measure both the current performance and the structural make-up of the Canadian economy by type of economic transaction and by sector. This set of accounts is designed to provide structural and current information on the Canadian economy in direct support of fiscal, monetary, human resource, industrial and international economic policy formulation and adjustment. The System of National Accounts also serves as a framework within which individual statistical series are compared to assess their reliability and as an analytic tool to identify shifts in the economic importance of various sectors.

Another component of Economic Statistics focuses on the business, trade and tourism sectors of the Canadian economy. Information includes measures of the value of production, cost structures, commodities produced and consumed, the flows and stocks of fixed capital assets employed in the economy, the degree of capacity utilization, estimates of planned annual capital expenditure of businesses and governments, and measures of price changes for industrial goods, capital expenditures and construction.

The Household Statistics component of this business line provides information on the economic and social characteristics of individuals, families and households in Canada, and on the major factors which can contribute to their well-being. It includes measures of household income and expenditure; of employment, unemployment, their associated costs and benefits, labour income and factors effecting labour supply; and information on topics of specific social policy concern.

The Institutions Statistics component of this business line provides information and analysis on the facilities, agencies and systems which are publicly funded to meet the socio-economic and physical needs of Canadians, and on the outcomes of the services which they provide. It encompasses the justice, health care, and education systems as well as cultural institutions and industries, in terms of the nature and extent of their services, and operations, the characteristics of the individual Canadians and families whom they serve, and their impacts on Canadian society. Increasingly, the Agency is attempting to go beyond the institutional orientation of this component, and to try to portray the impacts on Canadians of the activities of the health, education and justice systems.

### *Census of Population Statistics*

This business line provides statistical information from the quinquennial Census of Population. The Census provides benchmark information on the structure of the Canadian population and its demographic, social and economic conditions. It provides the detailed information needed on subgroups of the population and for small geographic areas, which cannot be generated through sample surveys. Estimates of the size of the population and its demographic structure between Censuses, as well as population projections, are dependent on Census information.

Population counts and estimates are required to determine electoral boundaries, the distribution of federal transfer payments, and the transfer and allocation of funds among regional and municipal governments, school boards and other local agencies within provinces.

# Natural Resources Department

## Objectives

To advance the development of Canada’s economy by providing expert scientific and economic knowledge to Canadians, and by promoting the sustainable development and use of Canada’s natural resources and the competitiveness of the energy, forest, minerals and metals and geomatics industries.

## Business Line Descriptions

### *Information Dissemination and Consensus Building*

NRCan recognizes the need to invest in knowledge and systems innovation to create easily accessible and integrated information. To this end, the Department develops and maintains the knowledge infrastructure (*Res.Sources*) and databases, such as GeoConnections, necessary to provide Canadians with geographical and scientific information on the state of Canada’s landmass, and with sound economic, environmental advice on matters relating to the sustainable development and use of Canada’s natural resources and to public health and safety. It also gathers, shares, disseminates and analyzes information and prepares statistical reports on the productivity and competitiveness of the Canadian natural resource industry. The information is used as a basis for forecasting and reporting progress on market demand.

Promoting greater national and international cooperation and consensus on sustainable development is the basis for protecting existing resource-based benefits and building new opportunities in the knowledge-based economy. In this context, the Department co-manages the federal process to develop a National Implementation Strategy on the mitigation and adaptation to climate change. NRCan implements action plans, tools and testing that support new and innovative forest management practices. Under the terms of bilateral and multilateral agreements, the Department promotes globally the responsible development and use of minerals and metals and undertakes research and development to facilitate further growth for the Canadian geomatics industry. NRCan provides coordinated logistics advice and services in support of its scientific research programs and transfers its S&T technologies and sustainable resource management practices and techniques to stakeholders and users.

NRCan provides Canadians with the best possible fiscal and regulatory information to allow them to make informed decisions. In this regard, the Department develops national and international strategies, policies, regulations and voluntary approaches in support of sustainable development.

Included within this business line is the Geomatics Canada Revolving Fund. The fund was established under *Appropriation Act No. 3* in 1993-94. The fund allows Geomatics Canada to shift the costs of offering goods and services from taxpayers at large to specific users who benefit directly from them. This revenue retention mechanism gives Geomatics Canada the ability to recover full costs from Canadian customers and the freedom to charge market prices for international clients. It presents the opportunity to provide an increasing volume of products and services in response to the needs of Canadian clients as well as supporting the Canadian geomatics industry through the knowledge and expertise necessary to be competitive in the international market.

Parliament has previously authorized a total drawdown of \$8,000,000 for the Geomatics Canada Revolving Fund. The projected use of this authority as related to these Estimates is as follows:

	(thousands of dollars)
Anticipated unused authority as of April 1, 2000	7,174
Plus:	
2000–2001 Main Estimates – net cash provided	1,136
Anticipated unused authority as of March 31, 2001	8,310

## Natural Resources Department

### *Economic and Social Benefits*

Leading edge science and technology, expert policy advice and innovation are essential if Canada is to maintain and expand its market share in the new global economy. In this context, the Department identifies business opportunities for resource-based products, knowledge, technologies and services. It works with stakeholders to provide a business climate that enhances the competitiveness of the natural resource sector (e.g., the administration of Canada's mining taxation regime). The Department holds investment seminars to attract investment to Canada and addresses international environmental and trade issues related to the natural resource sector. NRCan also works with governments and industry on issues related to understanding the geological framework of the nation and to stimulate exploration.

NRCan works internationally to facilitate the export of Canadian resource-related goods and services, and promotes the transfer of technologies and the exchange of knowledge supporting the sustainable development and use of natural resources. NRCan, in conjunction with the Department of Foreign Affairs and International Trade, maintains good relationships with counterparts in other countries, while building awareness of foreign developments. The Department facilitates private sector access to foreign markets for natural resource products, management practices and services. It supports the Canadian geomatics and geoscience industry in major international projects, in the development of standards, exchange of information, research and development, in training and personnel exchange, and on government policies and programs. The Department also helps ensure Canadian competitiveness and the fulfilment of trade obligations. For example, it influences the harmonization of international standards and codes, participates in multilateral fora, provides advice to assist in negotiations on trade frameworks as well as regulatory, trade and foreign policy issues. Likewise, bilateral relations allow the Department to exchange information to promote regulatory and policy consistency and to provide ideas and insights concerning the implementation of energy-efficiency and forestry measures, both current and prospective.

NRCan, in conjunction with Indian and Northern Affairs Canada, manages programs to generate Aboriginal employment in the natural resource industry. The Department finances viable Aboriginal operations and enhances their management skills. In addition, NRCan promotes initiatives and regulations that focus on work opportunities, economic diversification and decision-making relating to sustainable land and resource development in rural, Aboriginal and northern communities.

Included within this business line is the Geomatics Canada Revolving Fund. Parliament has previously authorized a total drawdown of \$8,000,000 for the Geomatics Canada Revolving Fund. The projected use of this authority as related to these Estimates is included under the Information Dissemination and Consensus Building business line.

### *Environmental Protection and Mitigation*

NRCan has a key role in designing Canada's response options for climate change which are central to the federal government's mitigation and adaptation strategy and to the transformation of Canada's energy economy. In collaboration with its partners, the Department (i) develops a National Implementation Strategy for Climate Change, (ii) develops and promotes Canadian interests in meeting the Kyoto commitment and (iii) participates in Canada's international climate change agenda.

The Department manages the interdepartmental Program of Energy Research and development, develops and promotes the use of emerging and promising renewable resource technologies and alternative sources of energy, and develops and implements programs and technologies to promote energy efficiency in buildings, in industry and at home. In partnership with its clients and stakeholders, the Department also conducts forest science research and transfers technologies and techniques that contribute to Canada's forest health and sustainability, predicts and monitors the effects of human interactions and natural events on forest ecosystems, and conducts forest production research to ensure sustainability for difficult to grow and/or endangered trees. NRCan also develops and transfers technologies leading to more efficient industrial processes, the production of new, higher-performance mineral- and metal-based products and enhances the productivity of mining and ore processing operations. The Department carries out research that mitigates the impacts of effluent and drainage on mining and milling operations; provides technical support to mines in Canada on mine roof control, underground environmental assessment, ventilation and rockburst abatement; and makes improvements to procedures that apply to manufacturing.

## Natural Resources Department

The Department, in collaboration with its co-delivery partners, develops and implements policies and practices to address hazards associated with natural resource development and use. It recommends options for the long-term management of radioactive waste and spent nuclear fuel. NRCan also develops technologies to improve the structural reliability of Canada's pipeline infrastructure.

Included within this business line is the Geomatics Canada Revolving Fund. Parliament has previously authorized a total drawdown of \$8,000, 000 for the Geomatics Canada Revolving Fund. The projected use of this authority as related to these Estimates is included under the Information Dissemination and Consensus Building business line.

### *Safety and Security of Canadians*

NRCan plays a critical role in providing information and expertise to Canadians with respect to natural hazards. NRCan's scientific expertise provides the advice and research recommendations for minimizing risks associated with natural hazards like earthquakes. In addition, the Department provides topographical maps and satellite imagery to respond to these hazard emergencies and to provide information about soil types, risk areas and erosion patterns to understand the cause of disasters.

The Department provides a reliable system of surveys, topographical maps, aeronautical charts and publications, remotely sensed data and geographically referenced information covering Canadian territory, in support of national sovereignty, defense, the environment, socio-economic development and the governing of Canada. In partnership with its counterparts, NRCan also maintains the boundary between the United States and Canada and carries out boundary survey work and inspections.

NRCan is the Government's primary source of expertise on explosives regulations and technology. The Department develops technologies and conducts inspections associated with the manufacture, use, storage and transport of explosives and pyrotechnics. In conjunction with Justice Canada, NRCan works to improve safety in the explosives industry by producing the explosives regulations in plain language and assisting in negotiations in international agreements.

NRCan provides the policy framework for safety and security in Canada's energy sector and specifically for energy transmission, offshore development and Canada's uranium and nuclear industry. It makes recommendations to the Minister on issues concerning the National Energy Board, the Atomic Energy of Canada Limited, the Atomic Energy Control Board, and the Newfoundland and Nova Scotia Offshore boards. NRCan promulgates health and safety regulations to ensure the integrity of survival and evacuation systems for frontier oil and gas exploration and development.

Included within this business line is the Geomatics Canada Revolving Fund. Parliament has previously authorized a total drawdown of \$8,000,000 for the Geomatics Canada Revolving Fund. The projected use of this authority as related to these Estimates is included under the Information Dissemination and Consensus Building business line.

### *Sound Departmental Management*

This Business Line represents the corporate management that administers the Department's internal functions. It provides corporate strategic and management direction for aligning departmental objectives to ministerial and government priorities, for setting goals and monitoring results, and for managing allocated resources in an effective and efficient manner through: corporate strategic planning, department-wide policy coordination and issues management; Cabinet and Parliamentary liaison; financial, administration, real property, human resources, information management/information technology direction and services; communications strategy, advice and services; the administration of environmental policy and assessment activities; support to the Chief Science Advisor; and internal audits and program evaluations.

## Atomic Energy Control Board

### Objectives

To limit, to a reasonable level and in a manner that is consistent with Canada's international obligations, the risks to national security, the health and safety of persons and the environment that are associated with the development, production and use of nuclear energy and the production, possession and use of nuclear substances, prescribed equipment and prescribed information.

To implement, in Canada, measures to which Canada has agreed respecting international control of the development, production and use of nuclear energy, including the non-proliferation of nuclear weapons and nuclear explosive devices and to support international efforts to develop, maintain and strengthen the nuclear non-proliferation and safeguards regimes.

### Business Line Descriptions

#### *Health, Safety, Security and Environmental Protection*

The AECB regulates the development, production, possession and use of nuclear energy, substances, equipment and information through a comprehensive licensing system. This system is designed to minimize the likelihood that nuclear workers, the public and the environment are exposed to unacceptable levels of radiation and to the radioactive or hazardous substances associated with nuclear technology. The AECB regulates such operations and facilities as accelerators, non-power nuclear reactors, nuclear fuel facilities, nuclear research and test establishments, nuclear substance transport packages, pool-type irradiators, power reactors, radioisotopes, radioisotope production facilities, uranium mines and mills and nuclear waste management facilities.

#### *Non-Proliferation and Safeguards*

The AECB regulates non-proliferation and safeguards through the implementation of safeguards agreements between Canada and the International Atomic Energy Agency (IAEA) and the nuclear non-proliferation provisions of Canada's nuclear cooperation agreements; and the maintenance of both a comprehensive nuclear materials/activity accounting/verification framework and a nuclear export and import licensing system. In addition, the AECB participates in multilateral nuclear non-proliferation, safeguards and security initiatives to strengthen the international nuclear non-proliferation regime and provides advice to senior government officials on the development and application of Canada's nuclear non-proliferation policy, IAEA safeguards implementation and development and international issues concerning the security of nuclear material and facilities.

Members also participate in parliamentary associations and friendship groups, and are members of delegations in parliamentary exchanges. Professional advice is available to them on substantive issues involving the work of these associations and exchanges, and legal consultants provide advice and counsel with regard to the formulation of amendments to Government bills. ## National Round Table on the Environment and the Economy

### Objectives

To play the role of catalyst in identifying, explaining and promoting, in all sectors of Canadian society and in all regions of Canada, the principles and practices of sustainable development.

### Business Line Descriptions

*The provision of objective views and information regarding the state of the debate on the environment and the economy*

The NRTEE is a multistakeholder body comprised of a Chair and a maximum of 24 members who are opinion leaders from a variety of regions and sectors of Canadian society including business, labour, academia, environmental organizations and First Nations. The NRTEE actively promotes a round table and multistakeholder approach to analysing sustainable development issues and acts as a forum in which all points of view can be freely expressed and debated. The NRTEE members and stakeholders involved in its programs strive to define the relationship between the environment and the economy, to determine where consensus exists on resolving particular issues, and to identify any barriers that prevent consensus. This information is consolidated, assessed and communicated to stakeholders, relevant decision makers, and the media.

Within the NRTEE business line, activities are organized according to a number of program areas. Each potential program area is scoped and defined, and a task force assigned to oversee the associated activities. Emerging issues are continually explored, and if determined to be a priority, are established as new program areas as funds become available.

## Department

### *Government Services Program*

#### **Objectives**

To provide the best value for taxpayers' dollars in common and central services delivered to departments, agencies and other clients with due regard for the important government values of prudence, probity and transparency. By focusing on what the department does best – providing cost-effective services to government – PWGSC helps departments focus on what they do best.

#### **Business Line Descriptions**

##### *Real Property Services*

Real Property Services (RPS) Business Line activities center on two principal functions: real property stewardship and real property services. Using a net-voted appropriation, RPS provides leadership and stewardship as custodian of federal office and common-use facilities as well as various engineering works (e.g., bridges and dams). Related to this activity, RPS provides productive work environments for some 160,000 federal public servants (100 departments and agencies) and manages an inventory of some 6.0 million square meters of space at an annual net appropriation of approximately \$1.3 billion. Included in this inventory are national treasures such as the Parliamentary Precinct and heritage assets across Canada.

The RPS Business Line also provides expert and value-added professional and technical real property services (including architectural and engineering, real estate, and property and facilities management) to other departments and agencies. These services are provided on a fully optional basis and are charged at comparable market-based rates and managed through the RPS Revolving Fund. The services function also encompasses the administration, on behalf of the federal government, of Payments-in-Lieu of Taxes and the Real Property Disposition Revolving Fund, which facilitates the disposal of properties surplus to the needs of the government.

##### *Supply Operations Service*

The Supply component provides common services for acquiring goods and services on behalf of the federal government. It manages the supply process by assisting client departments with requirements definition, undertaking bid solicitation, evaluation and selection, and contract negotiation and administration. It also provides auxiliary services such as market research to identify what products are available from suppliers; product planning; method-of-supply studies; maintenance of statistical data base and reporting capability; policy framework; policy review and promulgation; and the technological infrastructure to support the electronic procurement function. In addition, Supply encompasses responsibility for all procurement-related aspects of Major Crown Projects.

Supply also includes certain specialized activities: marine inspection and technical services; cost analysis support; management of Crown-owned production assets; industrial security and personal security screening services for PWGSC and industry; development and maintenance of consensus standards and conformity assessment services; management of seized property (assets seized as a result of being obtained from the proceeds of crime); central freight, travel management, and household goods removal services; and, transportation advisory services.

The Crown Assets Distribution (CAD) component provides disposal services for all federal government departments and agencies. Disposal methods include sale, transfer, trade-in, donation, lease, loan and destruction.

##### *Receiver General*

The Receiver General Business Line is responsible for the receipt, transfer, holding, disbursement, reconciliation and monitoring of public money on behalf of the Government of Canada. The Business Line issues Receiver General payments, redeems and validates these instruments and Employment Insurance Warrants. It maintains the Accounts of Canada and provides interim reports, produces the Public Accounts of Canada and maintains the Central Accounting System. As a derivative of the above activity, the Receiver General provides optional related financial services to departments and agencies.

### *Government Services Program*

#### *Public Service Compensation*

Public Service Compensation administers government payroll and pension processes, including the development and maintenance of computer systems and a national service office infrastructure, in order to allow departments to administer pay and benefits in accordance with the collective agreements and compensation policies established by Treasury Board and for the purpose of the administration of the *Public Service Superannuation Act* (PSSA). It also provides specialized pension services to National Defence and the Royal Canadian Mounted Police (RCMP) for the administration of their plans.

#### *Government Telecommunications and Informatics Services*

Government Telecommunications and Informatics Services (GTIS) acts as a key delivery agent of the Government of Canada's Information Management/Information Technology (IM/IT) Federated Infrastructure, which provides a secure delivery channel for electronic commerce and electronic service delivery government-wide. It also provides optional IM/IT services supporting the program delivery requirements of all federal departments, including PWGSC. GTIS provides leadership in supporting government-wide initiatives to solve fundamental IM/IT issues, development of a secure electronic delivery channel, IM/IT risk management and community renewal. Its services are delivered through partnership arrangements with the private sector and public sector institutions.

GTIS offers the following types of services:

- Strategic Services, focusing on development of government portfolio strategies and key technology partnerships, GOC IM/IT community renewal through *The Institute* and software sharing within the Government of Canada and with other levels of government through the *Software Exchange Service*;
- Secure Electronic Commerce and Emerging Technologies Services, focusing on provision of electronic commerce services and deployment of the Federated Infrastructure, which provides a secure electronic delivery channel for government;
- Applications Management Services, focusing on productivity, quality and enhancement of common support applications and information management;
- Network and Computer Services, focusing on end-to-end accountability and optimization of IM/IT network and computer services;
- Telecommunications Services, focusing on brokering telecommunications services from the private sector to meet the needs of small- and medium-sized departments; and
- Management Services, focusing on modernizing management and administrative practices to enhance GTIS efficiency.

#### *Consulting and Audit Canada*

Consulting and Audit Canada (CAC) is a Special Operating Agency that provides, on an optional and fee-for-service basis, consulting and audit services to federal Government departments and agencies across Canada. Services may also be made available to foreign governments and international organizations. CAC helps clients to provide better service by improving public sector management, operations and administration while meeting the priorities and needs of government. CAC stresses excellence in client service and the sharing of public sector expertise. Consulting and audit services focus on areas of particular relevance to the federal government and evolve with the needs of the public service managers and the priorities of the government. A few examples of CAC's services include program management and review, information technology development and review, financial management and approaches to risk management and comptrollership along with a variety of audit services. More than half of CAC services are delivered through partnering with the private sector via subcontracting, with the remainder delivered by in-house resources.

#### *Translation Bureau*

The Translation Bureau was established as a Special Operating Agency in 1995. The Bureau's translation services (official languages and over 100 other languages) to other federal government departments and agencies are optional and are provided on a cost-recovery basis. The Bureau receives vote funding for providing translation and interpretation services to Parliament and for supplying other government departments and agencies with standardized terminology and certain conference interpretation services. The Bureau maintains the mandate to standardize the use of terminology in the federal public service. The provision of these services is essential for the government to be able to deliver programs and services in both official languages.

Certaines dépenses en argent incluses dans le Budget des dépenses n'influent pas sur le solde de fonctionnement. Ces deux types de dépenses peuvent être rapprochées de la façon suivante :

## *Conseils et Vérification Canada*

Conseils et Vérification Canada (CVC) est un organisme de service spécial qui fournit, contre rémunération, des services optionnels de consultation et de vérification aux ministères et aux organismes fédéraux partout au Canada. Les services de CVC peuvent également être mis à la disposition des gouvernements étrangers et des organismes internationaux. CVC aide ses clients à offrir un meilleur service en améliorant la gestion, les opérations et l'administration du secteur public, tout en respectant les priorités et les besoins du gouvernement. Il met l'accent sur l'excellence du service à la clientèle et le partage des compétences du secteur public. L'organisme porte également une grande attention aux aspects qui intéressent particulièrement le gouvernement fédéral et évolue en fonction des besoins des gestionnaires de la fonction publique et des priorités gouvernementales. Voici quelques exemples des services qu'offre Conseils et Vérification Canada : gestion et examen des programmes, élaboration et examen de technologies de l'information, gestion financière et approches liées à la gestion des risques et à la fonction de contrôle, et une gamme de services de vérification. Plus de la moitié des services de CVC sont assurés par la sous-traitance confiée au secteur privé, tandis que les autres sont fournis par des ressources internes.

## *Bureau de la traduction*

Le Bureau de la traduction est devenu un organisme de service spécial en 1995. Les services de traduction (dans les deux langues officielles et dans plus de cent autres langues) offerts aux autres ministères et organismes fédéraux sont facultatifs et fournis selon le principe du recouvrement des coûts. Le Bureau reçoit des crédits pour assurer des services de d'interprétation et de traduction au Parlement et pour fournir à d'autres ministères et organismes fédéraux des services de terminologie et certains services d'interprétation de conférence. Il continue aussi d'uniformiser la terminologie utilisée au sein de la fonction publique fédérale. Enfin, ses services apportent une aide essentielle au gouvernement dans la prestation des programmes et services dans les deux langues officielles.

## *Services de coordination des communications*

Les services du secteur d'activité des Services de coordination des communications comprennent la coordination de la publicité et de la recherche sur l'opinion publique, de la surveillance des médias, des services d'acquisition et de communications à valeur ajoutée, et l'administration des droits d'auteur de la Couronne. De plus, les services d'accès public du Secteur comprennent la publication de la *Gazette du Canada*, le Programme des services aux déposataires, les services d'édition du gouvernement du Canada, Référence Canada, le site Web du Canada (site Internet principal du gouvernement canadien) et Publiservice.

Ces services jouent un rôle de premier plan pour ce qui est de permettre au gouvernement canadien de réaliser ses objectifs en matière de communications. Ils répondent à un besoin de la politique publique ou constituent des services communs partagés par tous les communicateurs du gouvernement tout en s'adressant à des ministères clients particuliers (services d'approvisionnement, par exemple). De plus, ils contribuent à l'atteinte des objectifs plus vastes du gouvernement en matière de communications (Référence Canada, surveillance électronique des médias, harmonisation de l'affichage et du marchandisage aux stands occupés par plusieurs ministères dans le cadre de foires et d'expositions, et le Programme des services aux déposataires, par exemple).

## *Soutien opérationnel*

Le Soutien opérationnel comprend deux gammes de services : une série de services de soutien regroupés sous la Gestion de l'information-Technologie de l'information (GI/TI) – Opérations ministérielles d'une part, et la Gestion d'autre part.

La gamme de services de Gestion de l'information-Technologie de l'information (GI-TI) – Opérations ministérielles, comprend le soutien de gestion de l'information et de la technologie de l'information (GI-TI) aux opérations et aux secteurs d'activité de TPSSGC.

La gamme de services de la Gestion ministérielle, comprend le soutien aux cabinets du ministre et du sous-ministre, la prestation de services intégrés à l'échelle nationale dans les domaines des finances, des communications, de la vérification et de l'examen, des ressources humaines, de la gestion du matériel, de la sécurité, du règlement des différends contractuels, de la politique et de la planification ministérielles, de la gestion de portefeuille, de la fonction de secrétaire ministériel et des services juridiques.

### Rémunération de la fonction publique

Le secteur de la Rémunération de la fonction publique se charge d'administrer les processus de paye et de pension du gouvernement, notamment d'élaborer et d'entretenir des systèmes informatiques ainsi qu'une infrastructure nationale de bureaux de services afin de permettre aux ministères d'administrer la paye et les avantages sociaux conformément aux conventions collectives et aux politiques en matière de rémunération établies par le Conseil du Trésor et aux fins de l'administration de la *Loi sur la pension de la fonction publique*. Ce secteur d'activité offre également des services spécialisés relatifs aux pensions au ministère de la Défense nationale et à la Gendarmerie royale du Canada pour l'administration de leurs régimes.

### Services gouvernementaux de télécommunications et d'informaticue

Les Services gouvernementaux de télécommunications et d'informaticue (SGTI) jouent le rôle de mandataire pour l'infrastructure fédérée de gestion de l'information-technologie de l'information (GI-TI) du gouvernement du Canada, qui constitue un circuit de prestation sûr pour le commerce électronique et la prestation des services électroniques dans l'ensemble du gouvernement. Ils offrent aussi des services de GI-TI optionnels dans la réalisation des programmes des ministères fédéraux dont ceux de TPSCG. Les SGTI exercent leur leadership pour appuyer les initiatives pangouvernementales visant à résoudre les problèmes essentiels de GI-TI, par exemple la mise en place d'un circuit de communication électronique sûr, la gestion des risques liés à la GI-TI et le renouvellement de la communauté de GI-TI. Ils offrent leurs services dans le cadre d'accords de partenariat avec le secteur privé et des institutions du secteur public.

### Voici la nature des services offerts par les SGTI :

- Services stratégiques, axés sur l'élaboration de stratégies pour le portefeuille du gouvernement et de partenariats technologiques clés, sur le renouvellement de la communauté de GI-TI à l'aide de l'Institut et sur le partage des logiciels au sein du gouvernement fédéral et entre paliers de gouvernement à l'aide du Service d'échange de logiciels;
- Services sûrs de commerce électronique et de technologies nouvelles, axés sur la prestation des services de commerce électronique et sur le déploiement de l'infrastructure fédérée, qui constituent un circuit électronique sûr de prestation pour le gouvernement;

- Services de télécommunications, axés sur le courtage des services de télécommunications auprès du secteur privé afin de répondre aux besoins des ministères de petite taille et de taille moyenne;
- Services de gestion, axés sur la modernisation des pratiques de gestion et d'administration afin d'accroître l'efficacité des SGTI.

## Objectifs

Notre but est d'optimiser les recettes fiscales dans la prestation des services communs et des services centraux dispensés aux ministères, organismes et autres clients, en accordant toute l'importance voulue aux valeurs que représentent pour le gouvernement la prudence, la probité et la transparence. En mettant l'accent sur ce que le Ministère fait de mieux, à savoir fournir au gouvernement des services communs et centraux rentables, TPSGC aide les ministères à se concentrer sur ce qu'ils font de mieux.

## Description des secteurs d'activité

### Services immobiliers

Le secteur d'activité des Services immobiliers (SI) est axé sur deux fonctions principales : la gestion des biens immobiliers et les services immobiliers. Financés par un crédit net approuvé, les SI assument à titre de gardiens la direction et l'entendance des immeubles fédéraux à bureaux et des installations d'utilisations communes, ainsi que de différents ouvrages de génie (p. ex., ponts et barrages). Dans le cadre de cette fonction, les SI fournissent un milieu de travail productif à quelque 160,000 fonctionnaires fédéraux (100 ministères et organismes) et gèrent un ensemble de locaux d'une superficie d'environ 6 millions de mètres carrés financé par un crédit annuel net d'environ 1,3 milliard de dollars. Cet ensemble de locaux comprend entre autres des trésors nationaux, tels la Cité parlementaire et de nombreux édifices patrimoniaux répartis dans l'ensemble du Canada.

Le secteur des SI fournit aussi des services immobiliers spécialisés et à valeur ajoutée d'ordre technique et professionnel (notamment dans les domaines de l'architecture et du génie, de l'immobilier et de la gestion des immeubles et des installations) aux autres ministères et organismes. Ces services sont entièrement facultatifs, offerts contre rémunération à des tarifs comparables à ceux du marché et gérés par l'entremise du Fonds renouvelable des services immobiliers. Les SI administrent également, au nom du gouvernement fédéral, les paiements tenant lieu d'impôts et le Fonds renouvelable d'aliénation des biens immobiliers, qui s'occupe de l'aliénation des immeubles dont le gouvernement n'a plus besoin.

### Service des approvisionnements

Le volet des Approvisionnements fournit des services communs d'acquisition de biens et de services pour le gouvernement fédéral. Il gère le processus d'acquisition en aidant les ministères clients à définir leurs besoins, en lançant des appels d'offres, en évaluant et en choisissant les soumissions, ainsi qu'en négociant et en gérant des marchés. Il offre également des services auxiliaires, notamment la réalisation d'études de marché pour déterminer les produits offerts par les fournisseurs, la planification de produits, la réalisation d'études sur les méthodes d'approvisionnement, la tenue à jour de bases de données statistiques et d'outils servant à la production de rapports, l'établissement de cadres stratégiques, l'examen et la publication de politiques ainsi que l'entretien de l'infrastructure technologique qui sert de soutien aux fonctions électroniques utilisées pour les acquisitions. Il assume aussi la responsabilité de tous les aspects des grands projets de l'État liés aux acquisitions.

Ce secteur se charge aussi des activités spécialisées suivantes : inspections maritimes et services techniques; soutien de l'analyse des coûts; gestion de production de l'État; services de sécurité industrielle et d'enquêtes de sécurité sur le personnel pour TPSGC et les industries; élaboration et mise à jour de normes d'application générale et services d'évaluation de la conformité; gestion des biens saisis (à la suite d'un crime); service central de transport de marchandises; services de gestion de voyages et de déménagement d'articles de ménage et enfin, services de consultation en matière de transport.

Le volet de la Distribution des biens de la Couronne (DBC) fournit des services d'aliénation à tous les ministères et organismes fédéraux. Les méthodes d'aliénation des biens comprennent la vente, le transfert, l'échange, le don, la location, le prêt et la destruction.

\*CORCAN, une activité financée au moyen d'un fonds renouvelable, est inclus dans ce secteur d'activité. La partie de ce secteur d'activité reliée à CORCAN renvoie aux besoins de trésorerie du fonds pour l'exercice et ne reflète pas directement le bénéfice ou le déficit de fonctionnement que produira le fonds puisque celui-ci fonctionne selon la méthode de la comptabilité d'exercice. Objectifs

Assurer la direction de la politique d'ensemble pour les programmes du portefeuille et exercer des fonctions d'examen ayant rapport aux organismes du portefeuille.

Description des secteurs d'activité

*Conseils au Solliciteur général dans ses fonctions d'orientation des organismes, de gestion du portefeuille et de leadership national au niveau des politiques*

Le Ministère élabore, fournit et coordonne des avis opportuns, adaptés à la situation, complets et détaillés sur les politiques afin d'aider le Ministre à assumer ses fonctions : a) d'orienter les organismes du portefeuille et d'en répondre devant le Parlement, b) d'accroître la cohérence des politiques et leur coordination au sein du portefeuille, et c) d'exercer un leadership national dans les domaines de la police et de l'application de la loi, de la sécurité nationale, des services correctionnels et de la mise en liberté sous condition.

*Programme de services de police des Premières nations*

La mise en œuvre de la Politique sur la police des Premières nations offre des moyens pratiques pour améliorer l'administration de la justice dans les Premières nations grâce à la création et au maintien de services de police professionnels, efficaces et adaptés aux besoins particuliers des collectivités des Premières nations et des Inuits.

La Direction générale de la police des Autochtones est chargée de mettre en œuvre, de maintenir et d'étendre le Programme de services de police des Premières nations, dans le cadre de la Politique sur la police des Premières nations.

*Bureau de l'inspecteur général, SCRS*

Le Bureau de l'inspecteur général du SCRS existe en vertu de la Loi sur le Service canadien du renseignement de sécurité. L'inspecteur général a droit d'accès aux renseignements du SCRS et joue le rôle de vérificateur interne des activités de cet organisme pour le Solliciteur général. Le Bureau de l'inspecteur général vérifie régulièrement si le Service respecte ses politiques opérationnelles. Il vérifie également si les activités du SCRS sont conformes aux lois, aux pouvoirs, aux contrôles et aux normes qui régissent de telles activités. Il présente au Ministre, sur ces sujets, des rapports classifiés dans lesquels sont incorporés les conseils de l'inspecteur général ainsi qu'un certificat exigé par la Loi. Le Ministre et le Comité de surveillance des activités du renseignement de sécurité (CSARS) peuvent ordonner la tenue d'un examen spécial, ou l'inspecteur général peut entreprendre un tel examen de sa propre initiative.

*Services exécutifs et Services ministériels*

Ce secteur d'activité comprend la Division des services exécutifs, le Groupe des communications, la Direction générale des services ministériels et la Division des services juridiques.

Objectifs

Protéger les intérêts des consommateurs et contribuer aux soins de santé de la population canadienne en s'assurant que les prix fixés par les fabricants des médicaments brevetés ne sont pas excessifs.

Description des secteurs d'activité

*Conseil d'examen du prix des médicaments brevetés*

Le Conseil d'examen du prix des médicaments brevetés (CEPMB) recueille des renseignements sur les prix fixés au Canada par les fabricants des médicaments brevetés, analyse ces données et, s'il y a lieu, prend des mesures en vue d'obtenir une réduction des prix qui, de l'avis du Conseil, sont excessifs. Les réductions de prix sont obtenues par :

- des mesures prises volontairement par les brevetés;
- au moyen d'engagements de conformité volontaire (ECV) entraînant la réduction des prix et le remboursement des revenus excessifs; ou
- par des ordonnances correctives rendues à la suite d'une audience publique au cours de laquelle les prix ont été jugés excessifs.

Le CEPMB applique, dans la mesure du possible, le principe de la conformité volontaire parce qu'il est plus efficace, fait gagner du temps et coûte moins cher pour toutes les parties. Il est plus facile pour les titulaires de brevet de se conformer volontairement aux exigences grâce aux lignes directrices publiées pour aider les compagnies à fixer des prix qui ne sont pas excessifs.

En vertu de la *Loi sur les brevets*, le Conseil est tenu d'examiner le prix des médicaments dans d'autres pays, le prix d'autres médicaments dans une même classe thérapeutique, les changements de l'indice des prix à la consommation (IPC) ainsi que d'autres facteurs pour déterminer si le prix d'un médicament est excessif. La Loi autorise le ministre de la Santé, en consultation avec les ministres de la Santé provinciaux et d'autres ministres, à prendre des dispositions, par règlement, concernant d'autres facteurs dont le Conseil devra tenir compte pour déterminer si un prix est excessif; ces modifications autorisent de plus le Ministre à attribuer d'autres fonctions et d'autres pouvoirs au CEPMB. De plus, le ministre de la Santé peut charger le Conseil de mener des enquêtes sur certaines questions.

Le CEPMB adresse également un rapport au Parlement sur les tendances des prix et sur les dépenses de recherche-développement faites par l'ensemble de l'industrie des produits pharmaceutiques brevetés et par chacun des titulaires de brevet au Canada.

## Objectifs

Permettre aux fournisseurs ou aux employeurs de matières industrielles dangereuses de protéger les renseignements commerciaux confidentiels (RCC) relatifs à leurs produits et, en même temps, assurer aux travailleurs l'accès à des renseignements exacts relativement aux incidences de ces produits sur la santé et la sécurité.

## Description des secteurs d'activité

### *Conformité des fiches signalétiques*

En assurant la conformité des fiches signalétiques et des étiquettes aux exigences du Système d'information sur les matières dangereuses utilisées au travail (SIMDUAT), ce secteur d'activité contribue à renseigner les travailleurs sur les dangers que peut entraîner pour la santé et la sécurité l'exposition aux substances chimiques entrant dans la composition de produits qui font l'objet d'une demande de dérogation. Cela inclut l'évaluation des données scientifiques relatives à chaque ingrédient dans la fabrication du produit, de même que les avis sur les dangers des produits pour la santé et la sécurité selon les critères de la *Loi sur les produits dangereux*, le *Code canadien du travail* et les lois provinciales et territoriales en matière de santé et de sécurité au travail. En cas de non-conformité, une ordonnance officielle est émise afin de corriger la fiche signalétique et de la rendre conforme aux exigences réglementaires.

Cette activité continuera de contribuer directement à réduire les maladies et les blessures relatives aux lieux de travail, ce qui, en retour, aidera à soulager les tensions économiques attribuables aux demandes d'indemnisation et aux coûts des services de santé.

### *Services à la clientèle*

Les responsabilités dans ce secteur incluent l'enregistrement officiel des demandes d'exemption, l'émission de numéro d'enregistrement, la protection des RCC et l'émission d'une décision sur la validité de la demande conformément aux prescriptions de la *Loi sur le contrôle des renseignements relatifs aux matières dangereuses*. En outre, les Services à la clientèle fournissent des avis et des renseignements aux demandeurs d'exemption et assurent le suivi en matière de

### *Règlement des différends*

Ce secteur d'activité comprend la constitution de commissions tripartites indépendantes pour entendre les appels ou régler les différends des demandeurs d'exemption ou des parties concernées, afin de régler la question ou les différends aussi rapidement et efficacement que possible.

Un appel peut avoir trait à la conformité d'une fiche signalétique, au rejet d'une demande ou à une demande de divulgation, à titre confidentiel, de renseignements commerciaux à une partie concernée pour des motifs de santé et de sécurité au travail.

Des options rentables et justes de règlement de différends, telles que la médiation ou la discussion dirigée, seront offertes à toutes les parties concernées.

## Objectifs

Le Ministère a pour mission d'aider les Canadiens et les Canadiennes à maintenir et à améliorer leur état de santé.

## Description des secteurs d'activité

### Gestion des risques pour la santé

Ce secteur d'activité est chargé de prévoir et de prévenir les risques pour la santé que présentent les aliments, l'eau, les médicaments, les matériaux médicaux et autres produits thérapeutiques, les risques environnementaux et hygiéniques, les maladies, les biens de consommation, les produits antiparasitaires, le sang et les produits du sang, les catastrophes qui se produisent en temps de paix et certains déterminants de la santé tels que le comportement d'une personne, la famille, les conditions sociales et économiques. Ce secteur d'activité est aussi chargé de réagir à ces risques.

### Promotion de la santé de la population

Ce secteur d'activité se fonde sur une perception élargie et intégrée de la santé de la population qui tient compte des déterminants sociaux, comportementaux, et économiques de la santé. Il cherche à réduire les inégalités entre les Canadiens et les Canadiennes sur le plan de la santé en élaborant et en soutenant des politiques et des programmes de prévention de la maladie et de promotion de la santé, en collaboration avec d'autres ministères, les gouvernements provinciaux et territoriaux, et les intervenants non gouvernementaux. Ce secteur d'activité favorise les mesures de promotion de la santé qui sont axées sur les déterminants liés directement à la santé ou à d'autres domaines, tout au long du cycle de vie. Ce secteur d'activité met en évidence la nécessité de se concentrer sur les enfants en bas âge pour favoriser un meilleur état de santé à long terme. Les services de ce secteur d'activité sont dispensés suivant un cadre axé sur les trois stades du cycle de vie : i) enfance/adolescence; ii) début de l'âge adulte/maturité; iii) troisième âge.

### Santé des Autochtones

Les spécialistes du domaine de la santé et les Autochtones ont établi que, lorsque ceux-ci pourront prendre leurs propres décisions en matière de santé, il sera plus facile d'améliorer leur état de santé par rapport aux autres Canadiens et Canadiennes et de remédier aux préoccupations quant aux services de santé qui leur sont destinés. Le secteur d'activité, Santé des Autochtones, cherche à accroître le contrôle et la gestion des services de santé communautaires par les Autochtones. Divers moyens sont utilisés à cette fin : transferts, accords de contribution intégrés et d'autres mesures de financement des services de santé, valorisation du potentiel et formation. Ce secteur d'activité appuie également des activités qui visent à améliorer la situation des Premières nations et des Inuits du point de vue de la santé.

### Soutien et renouvellement du système de santé

Ce secteur d'activité offre un soutien au leadership dans tous les domaines du système de santé canadien. Il met à profit les connaissances et les interventions de l'ensemble du Ministère afin d'assurer la viabilité et le coût abordable de l'assurance-santé, ainsi qu'un meilleur équilibre au sein du système de santé entre les soins, la promotion de la santé, la prévention des maladies et la protection de la santé. Ce secteur d'activité vise à accroître l'efficacité et l'efficience du système en collaboration avec les provinces et les territoires.

### Politique, planification et information en matière de santé

Ce secteur d'activité contribue à l'atteinte des objectifs du gouvernement fédéral en matière de santé de la manière suivante : à l'interne, il intègre de façon efficace par rapport au coût les activités et les leviers (surveillance, recherche, politiques, communications, relations fédérales-provinciales et internationales, lois, consultation, planification et examen) de tous les secteurs d'activité afin d'exécuter le programme du gouvernement fédéral dans le domaine de la santé et d'assumer les responsabilités fondamentales de Santé Canada; à l'externe, il favorise la production, la diffusion et l'utilisation de renseignements sur la santé, eu égard aux rôles des partenaires du Ministère dans ce domaine.

### Services ministériels

Ce secteur d'activité fournit des services et des conseils aux cadres supérieurs du Ministère pour répondre aux besoins liés à la gestion, à l'utilisation et au contrôle des ressources humaines et financières, aux installations et aux biens, à l'informatique et à la vérification.

Objectifs

Développer l'application de l'énergie nucléaire à des fins pacifiques.

Description du financement par voie de crédits

*Recherche et développement en matière nucléaire*  
Assurer le fonctionnement des laboratoires nucléaires à Chalk River et à Whiteshell afin d'avoir une base technologique pluridisciplinaire pour le programme d'énergie nucléaire canadien. Les Laboratoires de Whiteshell sont dans une période de transition qui mènera ultérieurement à leur fermeture et à leur déclassement.

Entendre des travaux de recherche appliquée et de développement portant sur les réacteurs nucléaires actuels et futurs, les cycles et systèmes de combustible, pour la protection de l'environnement, la gestion des déchets radioactifs et les systèmes de garantie nucléaire, afin :

- i) d'assurer au Canada un approvisionnement en énergie sûr et fiable à long terme;
- ii) d'accroître l'application de l'énergie nucléaire pour surmonter les pénuries d'énergie futures;
- iii) de renforcer l'option CANDU en améliorant le rendement, l'intégrité et la sûreté des réacteurs;
- iv) de démontrer que les déchets radioactifs et leurs sous-produits peuvent être gérés en toute sécurité.

Entendre des recherches de soutien dans des domaines tels que les propriétés des matériaux, la chimie dont celle qui est essentielle à la mise au point du combustible et à la gestion des déchets radioactifs, et les effets des rayonnements sur les êtres humains.

Les programmes précités nécessitent d'importantes installations telles que des réacteurs, des boucles d'essais, des accélérateurs, des cellules chaudes, des usines de traitement de déchets ainsi que des services de soutien, notamment des services financiers et administratifs, et des services d'ingénierie et d'entretien.

Objectifs

Limiter, à un niveau raisonnable et d'une façon conforme aux obligations internationales du Canada, les risques que comportent, pour la sécurité nationale, la santé et la sécurité des personnes ainsi que pour l'environnement, le développement, la production et l'utilisation de l'énergie nucléaire ainsi que la production, la possession et l'utilisation des substances nucléaires, de l'équipement et de l'information réglementés.

Appliquer les mesures que le Canada s'est engagé à prendre en matière de contrôle international du développement, de la production et de l'utilisation de l'énergie nucléaire, ce qui englobe la non-prolifération des armements nucléaires et des explosifs nucléaires et le soutien aux efforts internationaux pour élaborer, maintenir et renforcer le régime de non-prolifération nucléaire et le système de garanties.

Description des secteurs d'activité

*Santé, sûreté, sécurité matérielle et protection environnementale*  
La CCEA réglemente le développement, la production, la possession et l'utilisation de l'énergie nucléaire, de même que des substances, de l'équipement et de l'information nucléaires réglementés au moyen d'un régime complet de permis. Ce régime est conçu pour réduire la probabilité que les travailleurs du nucléaire, le public et l'environnement soient exposés à des niveaux inacceptables de rayonnement et aux substances radioactives ou dangereuses associées à la technologie nucléaire. La CCEA réglemente des activités et installations nucléaires telles que les accélérateurs, les réacteurs nucléaires non producteurs de puissance, les installations de combustible nucléaire, les établissements de recherche et d'essais nucléaires, les emballages pour le transport des substances nucléaires, les irradiateurs de type piscine, les réacteurs nucléaires, les radioisotopes, les installations de production de radioisotopes, les mines et les usines de concentration d'uranium et les installations de gestion des déchets nucléaires.

*Non-prolifération et garanties*  
La CCEA réglemente la non-prolifération et les garanties par la mise en œuvre de accords de garanties conclus entre le Canada et l'Agence internationale de l'énergie atomique (AIEA), et l'application des dispositions des accords de coopération du Canada concernant la non-prolifération nucléaire et la maintenance à la fois d'un système complet pour comptabiliser et vérifier les matières et les activités nucléaires et d'un régime de permis d'exportation et d'importation. En plus, la CCEA participe aux initiatives multilatérales de non-prolifération nucléaire, de garanties et de sécurité pour renforcer le régime international de non-prolifération et procure des conseils aux hauts fonctionnaires sur l'élaboration et l'application de la politique canadienne de non-prolifération nucléaire et du système de garanties de l'AIEA, ainsi que sur les dossiers internationaux touchant la sécurité des matières et des installations nucléaires.

RNCan définit le cadre stratégique des mesures canadiennes de sûreté et de sécurité qui s'appliquent aux activités du secteur de l'énergie et plus particulièrement au transport de l'énergie, à la mise en valeur des ressources extracôtières et de l'industrie canadienne de l'uranium et de l'énergie nucléaire. Il formule des recommandations au Ministre sur les questions qui intéressent l'Office national de l'énergie, Énergie atomique du Canada Limitée, la Commission de contrôle de l'énergie atomique et les Offices des hydrocarbures extracôtiers de Terre-Neuve et de la Nouvelle-Écosse. RNCan promulgue des règlements en matière de santé et de sécurité pour assurer l'intégrité des dispositifs de survie et d'évacuation pour l'exploration et la mise en valeur du pétrole et du gaz des régions pionnières.

Le fonds renouvelable de Géomatique Canada relève également de ce secteur d'activité. Le Parlement a précédemment autorisé un prélèvement total de \$8,000,000 au titre du fonds renouvelable de Géomatique Canada. L'utilisation prévue de cette autorisation du Budget des dépenses apparaît sous le secteur d'activité Diffusion de l'information et établissement d'un consensus.

*Saine gestion ministérielle*

Ce domaine d'activité concerne le fonctionnement interne du Ministère. Il crée une orientation stratégique permettant d'aligner les objectifs ministériels sur les priorités du Ministre et du gouvernement, de fixer des objectifs et de surveiller les résultats, ainsi que de gérer efficacement les ressources attribuées, par les moyens suivants : planification stratégique ministérielle, coordination de la politique à l'échelle du Ministère et gestion au cas par cas; liaison avec le Cabinet et le Parlement; direction et services dans les domaines des finances, de l'administration, des biens immobiliers, des ressources humaines, de la gestion de l'information et de la technologie de l'information; stratégie de communication, conseils et services; administration de la politique environnementale et des activités d'évaluation; appui au conseiller scientifique en chef; vérifications internes et évaluations des programmes.

Nota : Le Budget principal des dépenses de 1999-2000 a été rajusté afin de tenir compte des modifications apportées à la Structure de planification, de rapport et de responsabilisation (SPRR) de 2000-2001. En 1999-2000, le fonds renouvelable de Géomatique Canada était considéré comme étant un secteur d'activité distinct. Toutefois, en 2000-2001, il a été amalgamé aux cinq nouveaux secteurs d'activités.

*Protection de l'environnement et atténuation des impacts environnementaux*

RNCan exerce un rôle de premier plan pour ce qui est de définir les moyens que le Canada doit opposer au changement climatique et qui s'inscrivent dans la stratégie que le Canada doit mettre en œuvre pour atténuer les répercussions sur l'environnement de l'exploitation des ressources, s'adapter au changement climatique et modifier en conséquence son économie de l'énergie. En collaboration avec ses partenaires, le Ministère : i) définit une Stratégie nationale de lutte contre le changement climatique, ii) définit et fait progresser les intérêts canadiens à remplir les engagements de Kyoto et iii) participe au déploiement du volet canadien du programme international de lutte contre le changement climatique.

Le Ministère gère le Programme de recherche et d'exploitation énergétiques, développe des technologies novatrices et prometieuses d'exploitation durable des ressources ainsi que des sources d'énergie de remplacement, ou en fait avancer l'utilisation, et met en œuvre des programmes et des technologies qui favorisent un meilleur rendement énergétique dans les édifices, l'industrie et les maisons. En partenariat avec ses clients et les intervenants, le Ministère effectue également des recherches en foresterie et le transfert de technologies qui contribuent à préserver la santé et la durabilité des forêts, prévoit et gère l'incidence de l'interaction de l'activité humaine et de la nature avec les écosystèmes forestiers, et mène des recherches sur la production sylvicole pour assurer la pérennité des essences d'arbres à croissance difficile et menacée. RNCan met aussi au point et transfère des technologies susceptibles de déboucher sur des processus industriels plus efficaces, sur la production de nouveaux produits à base de minéraux et de métaux qui sont plus performants et favorise la productivité des activités d'extraction et de traitement du minéral. Le Ministère effectue des recherches dans le but d'atténuer les répercussions des effluents et du drainage acide qui résultent des opérations d'extraction et de traitement, fournit un soutien technique à l'exploitation des mines canadiennes en matière de contrôle des toits de mines, d'évaluation des environnements souterrains, de ventilation et de réduction des coups de toit et apporte des améliorations aux procédés de transformation.

En collaboration avec ses partenaires, le Ministère met au point et en œuvre des politiques et pratiques destinées à contrôler les risques associés à la mise en valeur et à l'utilisation des ressources naturelles. Il recommande des stratégies de gestion à long terme des déchets radioactifs et du combustible nucléaire épuisé. RNCan met également au point des stratégies pour accroître la fiabilité structurelle de l'infrastructure des gazoducs canadiens.

Le fonds renouvelable de Géomatique Canada relève également de ce secteur d'activité. Le Parlement a précédemment autorisé un prélèvement total de \$8,000,000 au titre du fonds renouvelable de Géomatique Canada. L'utilisation prévue de cette autorisation du Budget des dépenses apparaît sous le secteur d'activité Diffusion de l'information et établissement d'un consensus.

*Sûreté et sécurité des Canadiens*

RNCan joue un rôle de premier plan dans la fourniture d'information et d'expertise aux Canadiens en ce qui a trait aux risques naturels. L'expertise scientifique de RNCan fournit les conseils et les recommandations en matière de recherches permettant de minimiser les risques associés aux risques naturels comme les séismes. De plus, le Ministère fournit des cartes topographiques et des images transmises par satellite afin de répondre aux urgences causées par ces risques et de fournir de l'information sur les types de sol, les régions à risque et les processus d'érosion qui permettent de comprendre la cause des désastres.

Le Ministère fournit un système fiable de levés, des cartes topographiques, des cartes et des publications aéronautiques, des données de télédétection et de l'information géoréférencée couvrant tout le territoire canadien, afin d'appuyer la souveraineté nationale, la défense, la protection de l'environnement, le développement socio-économique et la conduite des affaires du Canada. De concert avec ses homologues, RNCan entretient également la frontière qui sépare le Canada des États-Unis et y effectue des travaux de levé et d'inspection.

RNCan constitue la principale source d'expertise du gouvernement en matière de réglementation et de technologie des explosifs. Le Ministère produit des technologies et mène des inspections relativement à la fabrication, à l'utilisation, à l'entreposage et au transport des explosifs et des pièces pyrotechniques. De concert avec Justice Canada, RNCan œuvre à rendre l'industrie des explosifs plus sécuritaire en reformulant la réglementation des explosifs dans une langue plus simple et en apportant son concours à la formulation d'ententes internationales à ce sujet.

Le Parlement a précédemment autorisé un prélèvement total de \$8,000,000 au titre du fonds renouvelable de Géomatique Canada. Voici comment il est prévu d'utiliser cette autorisation du Budget des dépenses :

*Avantages économiques et sociaux*

À l'heure de la mondialisation du marché, sciences et technologie de pointe, conseils d'expert stratégiques et innovation sont indispensables pour permettre au Canada de conserver et d'étendre sa part du marché. À cette fin, le Ministère repère les débouchés commerciaux pour vendre nos produits, connaissances, technologies et services axés sur les ressources. Il collabore avec les intervenants pour établir une conjoncture commerciale qui favorise la compétitivité du secteur des ressources naturelles (p. ex. l'administration du régime fiscal du secteur canadien des minéraux). Le Ministère organise des ateliers pour intéresser les investisseurs à la mise en valeur des ressources canadiennes et il se penche sur les préoccupations environnementales et commerciales d'envergure internationale qui concernent le secteur des ressources naturelles. RNCan collabore également avec les gouvernements et l'industrie pour mieux comprendre la géologie du pays et stimuler l'exploration.

RNCan exerce son influence à l'échelle internationale pour faciliter l'exportation des produits et services canadiens tirés des ressources et pour favoriser le transfert des technologies et le partage des connaissances à l'appui de la mise en valeur et de l'utilisation durables des ressources naturelles. En collaboration avec le ministère des Affaires étrangères et du Commerce international, il entretient de saines relations avec ses homologues d'autres pays tout en recherchant les possibilités de mise en valeur qui s'offrent à l'étranger. Le Ministère facilite pour le secteur privé des ressources naturelles l'accès aux marchés internationaux des produits, des pratiques de gestion et des services. Il appuie l'industrie canadienne de la géomatique et des sciences de la Terre dans sa participation à des projets internationaux d'importance majeure, dans l'élaboration des normes, l'échange d'information, la recherche et développement, la formation et l'échange de personnel et dans l'application des politiques et programmes gouvernementaux. Le Ministère contribue aussi à faire en sorte que le Canada demeure compétitif et qu'il s'acquitte de ses obligations commerciales. Entre autres, il agit de manière à favoriser l'harmonisation des normes et des codes internationaux, participe à des forums multilatéraux, dispense des conseils pour faciliter les négociations concernant les cadres des relations commerciales ainsi que le règlement des questions qui se posent à l'étranger en matière de commerce et de politique. Parallèlement, et dans le cadre de relations bilatérales, le Ministère est en mesure de mener un échange d'information qui favorise l'harmonisation des réglementations et des politiques et de fournir des idées et des points de vue sur la mise en œuvre des mesures actuelles et envisagées en matière d'efficacité énergétique et de gestion des forêts.

En collaboration avec Affaires indiennes et du Nord Canada, RNCan assure la gestion de programmes qui visent à procurer de l'emploi aux Autochtones dans l'industrie des ressources naturelles. Le Ministère finance des activités autochtones viables et renforce la capacité de gestion de ces collectivités. De plus, il souscrit à des initiatives et à des règlements qui ont pour but de procurer de l'emploi, de favoriser la diversification économique et la prise de décisions éclairées en matière de mise en valeur durable des terres et des ressources dans les collectivités rurales, autochtones et nordiques.

Le fonds renouvelable de Géomatique Canada relève également de ce secteur d'activité. Le Parlement a précédemment autorisé un prélèvement total de \$8,000,000 au titre du fonds renouvelable de Géomatique Canada. L'utilisation prévue de cette autorisation du Budget des dépenses apparaît sous le secteur d'activité Diffusion de l'information et établissement d'un consensus.

Objectifs	Description des secteurs d'activité
Contribuer à l'essor économique du Canada en fournissant aux Canadiens et aux Canadiennes des connaissances scientifiques et économiques d'experts, et en favorisant le développement durable et l'exploitation rationnelle des ressources naturelles du Canada ainsi que la compétitivité des industries de l'énergie, des forêts, des minéraux, des métaux et de la géomatique.	

*Diffusion de l'information et établissement d'un consensus*

Il importe d'investir dans le savoir et l'innovation des systèmes afin de créer des données intégrées et aisément accessibles. RNCan le reconnaît et s'emploie à le faire en constituant et en tenant à jour l'infrastructure de connaissances (ResSources) et les bases de données, comme GéoConnexions, nécessaires pour apporter aux Canadiens et aux Canadiennes des données géographiques et scientifiques sur l'état de la masse continentale du Canada et des conseils économiques et environnementaux judicieux concernant des questions reliées au développement et à l'utilisation durables des ressources naturelles canadiennes, la santé et la sécurité du public; en recueillant, partageant, diffusant et analysant des données et en préparant des rapports statistiques sur la productivité et la compétitivité de l'industrie canadienne des ressources naturelles. L'information est utilisée pour établir des prévisions et faire rapport sur l'évolution de la demande du marché.

La conservation des avantages tirés des ressources et la création de nouvelles possibilités dans le cadre de l'économie fondée sur le savoir passent par la stimulation d'une coopération et d'un consensus nationaux et internationaux plus efficaces en matière de mise en valeur durable des ressources. À cette fin, le Ministère cogère le processus fédéral d'élaboration d'une stratégie nationale de mise en œuvre de mesures d'atténuation des impacts environnementaux de l'exploitation des ressources et d'adaptation au changement climatique. RNCan met en œuvre des plans d'action, applique des moyens et procède à des essais à l'appui de pratiques de gestion des ressources forestières nouvelles et novatrices. Dans le cadre d'ententes bilatérales et multilatérales, le Ministère s'emploie à inculquer la mise en valeur et l'utilisation responsables des minéraux et des métaux et déploie des activités de recherche et développement pour stimuler l'essor de l'industrie canadienne de la géomatique. Le Ministère offre des conseils et des services coordonnés de logistique pour appuyer ses programmes de recherche scientifique et transfère ses technologies issues de la S-T et ses pratiques et techniques de gestion durables des ressources aux intervenants et aux utilisateurs.

RNCan fournit aux Canadiens l'information la plus pertinente possible en matière de fiscalité et de réglementation pour leur permettre de prendre des décisions éclairées. À cette fin, le Ministère définit des stratégies, des politiques, des règlements et des mécanismes d'action volontaire nationaux et internationaux à l'appui de la mise en valeur durable des ressources.

Le fonds renouvelable de Géomatique Canada relève également de ce secteur d'activité. Ce fonds a été établi en vertu de la Loi de crédits n° 3 pour 1993-1994. Le fonds permet à Géomatique Canada de transférer les coûts des biens et services des contribuables en général aux utilisateurs particuliers qui en bénéficient directement. Ce mécanisme de production de recettes donne à Géomatique Canada la possibilité de recouvrer intégralement les coûts de ses clients canadiens et la latitude d'exiger les prix du marché de ses clients internationaux. Il donne l'occasion de fournir un volume croissant de produits et de services répondant aux besoins des clients canadiens tout en appuyant l'industrie canadienne de la géomatique au moyen des connaissances et de l'expertise nécessaires pour soutenir la concurrence sur les marchés internationaux.

*Gestion de l'habitat et sciences de l'environnement*

Le secteur d'activité est chargé de l'élaboration et de la mise en œuvre de politiques, de plans et de programmes ainsi que de l'administration des lois et règlements ayant trait à la conservation des habitats aquatiques et de l'environnement. Cette activité englobe également l'étude et la surveillance des conditions chimiques et physiques qui ont un effet sur la qualité de l'environnement aquatique, de même que la collecte, l'analyse et l'interprétation des données à l'appui d'une exploitation économique durable des ressources aquatiques renouvelables du Canada et à l'appui de l'évaluation, de l'approbation et du contrôle des activités qui influent qualitativement et quantitativement sur l'habitat du poisson.

*Hydrographie*

Les relevés hydrographiques mesurent les paramètres qui sont nécessaires à la description de la nature exacte et de la configuration du fond marin et du lit des voies navigables intérieures, de leurs relations avec la masse continentale ainsi que des caractéristiques et de la dynamique de ces eaux. Les paramètres mesurés sont notamment la profondeur d'eau, le type de fond, les courants près de la surface, les marées et les niveaux d'eau. Les données réunies servent à la production de cartes de navigation et d'autres publications telles que les Annaires des courants et marées, les Instructions nautiques, les Guides pour petits bateaux et les Bulletins sur les niveaux d'eau. L'information hydrographique sert également à la détermination des limites des eaux nationales et des frontières maritimes.

*Gestion des pêches*

La Gestion des pêches est chargée des fonctions de gestion des ressources halieutiques dans toutes les provinces et dans les territoires du Canada, de même qu'à l'intérieur et à proximité des zones de pêche de 200 milles du Canada. Ces zones comprennent les réseaux fluviaux intérieurs et les lacs de toutes les provinces, sauf aux endroits où les pouvoirs en matière de gestion des pêches intérieures ont été délégués à la province ou au territoire. Il s'agit notamment de la gestion des parties canadiennes des cours d'eau transfrontaliers, de la gestion commune des pêches d'interception dans les eaux internationales et de la gestion des pêches autochtones, récréatives et commerciales dans les eaux côtières canadiennes. Il s'agit également de la négociation des ententes internationales pour promouvoir la conservation des ressources halieutiques du Canada, de concert avec d'autres ministères, ainsi que de la négociation et de l'administration des traités et accords internationaux touchant les relations bilatérales et multilatérales dans le domaine des pêches.

La réalisation des objectifs de la Gestion des pêches est appuyée par des programmes de réduction de la capacité tels que le Plan d'adaptation et de restructuration des pêches canadiennes (PARPC), la Stratégie du poisson de fond de l'Atlantique (SPFA) et le Programme d'adaptation et de redressement de la pêche de la morue du Nord (PARPMN). Ces programmes spéciaux répondent à des besoins particuliers et sont limités dans le temps.

*Ports*

L'exploitation et l'entretien d'un réseau national de ports de pêche et de plaisance supposent la construction et l'entretien de brise-lames et d'installations d'amarrage et de mise à l'eau, ainsi que le dragage, aux profondeurs requises, des chenaux et des bassins. Les activités additionnelles comprennent la fourniture et l'entretien d'aires et de matériel du service pour la manutention du poisson et des engins de pêche, de même que divers services à terre. La gestion du programme, y compris les services de génie et techniques, est assurée au niveau régional dans le cadre de politiques nationales, tandis que les services courants de gestion et d'administration, s'il y a lieu, sont locaux.

*Gestion de la flotte*

La Gestion de la flotte comprend l'acquisition, l'entretien et l'ordonnancement des flottes navales et aériennes du Ministère à l'appui des secteurs de programme suivants : les Services à la navigation maritime; les Services de communications et de trafic maritimes; les Opérations de déglacage; le secteur Sauvetage, sécurité et intervention environnementale; la Gestion des pêches; les Sciences halieutiques et océaniques; et l'Hydrographie. Les fonds nécessaires pour payer les équipages et l'administration des flottes sont fournis par ces secteurs de programme. La Gestion de la flotte prend aussi en charge les besoins d'augmentation de capacité en concluant des ententes avec les autres ministères et le secteur privé pour qu'ils apportent un soutien maritime et aérien supplémentaire aux programmes.

## Objectifs

L'objectif du Programme est de mettre en œuvre des politiques et des programmes qui soutiennent les intérêts économiques, écologiques et scientifiques du Canada concernant les eaux marines et les eaux intérieures; de voir à la conservation, au développement et à l'utilisation économique durable des ressources halieutiques du Canada dans les eaux marines et intérieures, au profit de ceux qui vivent ou bénéficient de ces ressources; de fournir un service maritime sécuritaire, efficace et respectueux de l'environnement qui répond aux besoins des Canadiens dans une économie mondiale; et de coordonner les politiques et les programmes du gouvernement du Canada qui touchent les océans.

## Description des secteurs d'activité

### *Services à la navigation maritime*

Les Services à la navigation maritime assurent la prestation, l'exploitation et l'entretien des aides à la navigation, l'aménagement et l'entretien des voies navigables, la protection du droit public à la navigation et la sauvegarde de l'environnement.

### *Services de communications et de trafic maritimes*

Les Services de communications et de trafic maritimes assurent les communications et la coordination concernant les urgences et la sécurité, le filtrage des navires pour empêcher l'entrée de bâtiments non sécuritaires dans les eaux canadiennes, la réglementation du trafic maritime et la gestion d'un système intégré d'information maritime et de services de correspondance publique. En plus d'assurer la sécurité de la navigation maritime, les Services de communications et de trafic maritimes appuient les activités économiques par une gestion optimale du trafic et de l'efficacité portuaire et par la facilitation de la liaison navire-terre au profit de l'industrie. Toutes ces fonctions sont régies par un cadre réglementaire qui est inspiré essentiellement de la *Loi sur la marine marchande du Canada* et de la Convention sur la sauvegarde de la vie humaine en mer.

### *Opérations de déglacage*

Les Opérations de déglacage sont des services d'escorte de brise-glace, d'entretien des chenaux, de lutte contre les inondations, d'ouverture des ports et de conseils et d'information à l'intention du grand public et des navigateurs traversant ou contournant des eaux envahies par les glaces. Elles coordonnent également le transport des marchandises pour le réapprovisionnement annuel des localités et des camps militaires du Nord au moyen de contrats avec des transporteurs commerciaux.

### *Sauvetage, sécurité et intervention environnementale*

Le secteur d'activité, Sauvetage, sécurité et intervention environnementale, se compose des grands domaines de programme suivants : opérations de recherche et de sauvetage en mer; intervention environnementale et protection civile nationale ministérielle; promotion de la sécurité de la navigation auprès du public maritime par la prévention et la réglementation.

### *Sciences halieutiques et océaniques*

Les écosystèmes marins sont surveillés et évalués au moyen de navires de recherche océanographique, de programmes de contrôle des pêches et de programmes en collaboration avec les pêcheurs. La mesure des paramètres océanographiques, tels que la température, la salinité, les niveaux d'eau et l'amplitude des vagues, se fait par divers intervenants tant à l'intérieur qu'à l'extérieur du Ministère. Les scientifiques travaillent en équipes interdisciplinaires de concert avec des pêcheurs et des chercheurs universitaires pour évaluer les populations de poissons dans un contexte écosystémique et environnemental plus vaste. Les études climatiques sont surtout axées sur les effets des changements climatiques dans l'océan sur des espèces de poissons comme la morue et le saumon et sur le rôle des océans dans le système climatique planétaire.

La science aquacole vise à rendre viables les nouvelles espèces de poissons d'élevage au Canada et à améliorer l'efficacité de l'élevage des espèces existantes. Les maladies qui frappent les poissons et qui se répandent dans les populations sont combattues par des règlements sur la protection de la santé des poissons, obligeant les installations de production de poissons à obtenir un certificat pour importer des poissons au Canada ou les transporter d'une province à l'autre.

*Recours*

Ce secteur entend les appels que logent des fonctionnaires à l'encontre de violations alléguées de la *Loi sur l'emploi dans la fonction publique* et de son Règlement, sur des questions telles que les nominations et l'avancement. Il doit également enquêter sur les plaintes concernant des irrégularités touchant le processus de renouvellement du personnel qui ne sont pas sujettes à un appel, enquêter sur des plaintes de harcèlement en milieu de travail, et parvenir à un règlement dans les cas où les plaintes sont fondées. Il fournit aussi de la formation, des conseils et de l'aide aux ministères, aux syndicats, à d'autres organismes et aux particuliers.

*Politiques, recherche et relations externes*

Ce secteur d'activité permet de mesurer, de faire rapport, de conseiller et d'élaborer des politiques dans les domaines relevant de la CFP. La prestation des services associés à ce secteur d'activité sera assurée par la Direction générale des politiques, de la recherche et des communications.

Ce secteur d'activité appuiera le repositionnement à moyen et à long terme de la CFP au moyen de recherches et d'analyses stratégiques, d'analyses de l'environnement et de liaisons avec les intervenants, principalement en ce qui concerne les questions liées au rôle de la CFP en tant que promoteur et gardienne d'une fonction publique professionnelle, non partisane et représentative, et des valeurs fondamentales de l'administration publique. Ce secteur d'activité se chargera en outre de renforcer le tronc commun des connaissances de la CFP. Il fournira des données stratégiques à la CFP et, en bout de ligne, au Parlement (par le rapport annuel de la CFP), provenant de la surveillance, de l'évaluation et de l'examen des politiques et des programmes de la CFP, ainsi que de la surveillance de la santé de la fonction publique dans les domaines reliés au mandat de la CFP.

Ce secteur d'activité s'acquittera des fonctions associées aux relations externes, comme le rapport au Parlement, au gouvernement et aux conseillers des organismes centraux sur les questions stratégiques intéressant la CFP, la liaison et l'échange d'information aux paliers fédéral, provincial et international, dans des domaines pertinents au mandat et aux responsabilités déléguées de la CFP.

*Services ministériels*

Les Services ministériels regroupent les activités du Président et des commissaires, les politiques et systèmes de gestion, les finances, la gestion des ressources humaines, l'informatique, la vérification interne et l'évaluation interne, ainsi que d'autres services administratifs et de soutien.

Objectifs

Les objectifs stratégiques de la Commission de la fonction publique (CCFP) visent, dans le cadre de son mandat législatif, à contribuer à assurer aux Canadiens :

- une fonction publique hautement compétente, non partisane, professionnelle dont les membres sont nommés au mérite;
- une fonction publique représentative;
- une fonction publique qui comprend et sait appliquer des valeurs démocratiques, éthiques et professionnelles;
- une fonction publique qui accroît ses compétences par le perfectionnement et l'apprentissage continu;
- la reconnaissance et le maintien d'une fonction publique non partisane en tant que pierre angulaire du système de gouvernance;
- une CFP qui, au nom de l'intérêt public, agit comme chef de file et gardien indépendant des principes d'une fonction publique professionnelle.

Description des secteurs d'activité

*Renouvellement du personnel*

Le secteur du renouvellement du personnel comprend des activités qui appuient la dotation déléguée et non déléguée, c'est-à-dire l'élaboration de programmes, l'administration de la délégation de la dotation, l'élaboration de tests et de normes de sélection, l'administration des priorités de dotation, le recrutement et l'avancement, et les initiatives en matière de diversité et d'équité en emploi. Il comprend aussi les programmes de renouvellement, d'échange et de perfectionnement du groupe des cadres de la direction.

Ce secteur est également responsable des initiatives d'équité en emploi et des programmes de perfectionnement pour le compte du Conseil du Trésor.

*Apprentissage*

Ce secteur regroupe deux gammes de service principales : la formation linguistique et le perfectionnement professionnel à l'intention des employés d'un niveau autre que EX.

Le secteur de la formation linguistique évalue le potentiel de réussite des employés admissibles à la formation linguistique, offre la formation linguistique statutaire ou facultative dans les deux langues officielles et l'orientation associée, de même que des services de formation linguistique. Il est responsable de la conception et de l'élaboration des cours de langue seconde et des outils qui permettent de satisfaire aux exigences linguistiques des postes des ministères, et de la prestation d'une vaste gamme de services consultatifs, d'information et de coordination dans le domaine de la formation linguistique.

La CFP propose une gamme variée de services et de produits d'apprentissage à différents groupes cibles, dont les analystes de politiques, les cadres intermédiaires et les superviseurs, les spécialistes des ressources humaines, les responsables de politiques, les analystes en communication et d'autres. L'accent est mis sur les messages généraux reliés à l'apprentissage (comme l'appareil gouvernemental, les valeurs et l'éthique) ainsi que sur les produits propres à l'apprentissage au sein du gouvernement, et non sur la formation propre au travail, dont la responsabilité revient aux ministères. La CFP offre des services de formation dans les deux langues officielles aux fonctionnaires fédéraux de tout le Canada pour satisfaire aux politiques du Conseil du Trésor et aux besoins des ministères.

Au fur et à mesure de son remaniement, la CFP mettra d'avantage l'accent sur une utilisation stratégique des ressources pour se concentrer sur la conception et l'élaboration de nouveaux services et produits d'apprentissage qui reflètent l'orientation stratégique du Comité consultatif du Secrétaire du Conseil du Trésor (CCSCT), et sur la mise sur pied d'une structure de gouvernance de deuxième niveau, les conseils consultatifs sur l'apprentissage pour chaque collectivité professionnelle stratégique.

## Description des secteurs d'activité

*Les opérations de l'Office national du film*

L'ONF est une agence culturelle qui relève du ministre du Patrimoine canadien et qui est gérée par un conseil d'administration nommé par le gouverneur général en conseil et présidé par le commissaire à la cinématographie canadienne.

L'ONF est un organisme intégré de production et de distribution de films et autres produits multimédias : les films y sont développés, scénarisés, tournés, traités, publiés, mis en marché, vendus et distribués. Son centre principal de production et de distribution est à Montréal mais il possède aussi des bureaux à Halifax, Moncton, Toronto, Winnipeg, Edmonton et Vancouver. Il compte également des bureaux à Paris, Londres et New York pour la mise en marché internationale de ses productions. Pour rendre son programme d'activités, il compte sur son propre personnel, mais il a également recours à des pigistes et s'associe au besoin à des partenaires des secteurs public et privé de la production et de la distribution.

Bien qu'il soit autonome et que, par tradition, il œuvre à distance du gouvernement, cet organisme cinématographique public contribue à plusieurs égards aux objectifs de la politique culturelle canadienne en offrant des films socialement et culturellement pertinents, en fournissant du matériel audiovisuel canadien aux milieux éducatifs, en appuyant directement diverses initiatives du gouvernement canadien ici et sur la scène internationale, en conservant et en facilitant l'accès à un riche patrimoine audiovisuel canadien, en soutenant le cinéma de la relève, en favorisant le développement du cinéma régional et celui des groupes de la diversité, en établissant des alliances stratégiques avec les secteurs privé et public, en favorisant la promotion de la culture canadienne à l'étranger et en encourageant la recherche et l'expérimentation dans les technologies des communications.

## Objectifs

Exploiter un service national de radio et de télévision dont le contenu et le caractère sont principalement canadiens et l'offrir, dans les deux langues officielles, à tous les Canadiens.

## Description du financement par voie de crédits

Les principaux secteurs d'activité de la Société pour la réalisation de ses objectifs sont décrits ci-dessous.

### *Coûts des services de télévision et de radio*

Ce secteur d'activité englobe tous les principaux services de diffusion, radio ou télévision, en français ou en anglais, à l'échelon national, régional ou local. Ce secteur comprend :

- la planification de chaque émission et des grilles de diffusion;
- l'acquisition d'émissions auprès d'autres organismes ou entreprises de production;
- la production d'émissions à l'interne;
- les services autofinancés ou exécutés à contrat, comme Radio Canada International, Galaxie, CBC Newsworld et le Réseau de l'information;
- les services de gestion opérationnelle offerts aux divers centres de production et de transmission, comme la supervision des émissions, la recherche en programmation, l'ingénierie, les ressources humaines, les services financiers et administratifs, et la gestion locale;
- les activités de vente et de marketing dont font l'objet les émissions et les messages publicitaires de la Société, y compris les commissions versées aux représentants et les frais liés à la vente des émissions.

### *Transmission, distribution et collecte*

Distribution, dans la mesure du possible, du service national de radiodiffusion dans toutes les parties du pays au moyen des installations de la Société ou d'installations privées. La distribution peut s'effectuer par satellite, par ondes ultracourtes et par ligne terrestre. Ce secteur d'activité comprend également la distribution du signal à chaque récepteur de radio et de télévision au moyen des émetteurs de la Société, par l'entremise de stations affiliées du secteur privé payées pour diffuser les émissions de Radio-Canada, ou par le biais d'installations qui permettent de différer ou de devancer la diffusion des émissions, selon les fuseaux horaires qui découpent le pays.

### *Administration nationale*

Fonctions dont la Société doit s'acquitter sur une base nationale, notamment la haute direction, la formulation des politiques et des normes, la planification stratégique et les relations externes.

### *Amortissement des immobilisations*

Ce poste représente le montant annuel comptabilisé pour l'amortissement des immobilisations de la Société. Le calcul de l'amortissement repose sur la méthode linéaire en vertu de laquelle les sommes amorties sont fonction de la durée de vie utile des immobilisations.

Ce poste ne nécessite pas de fonds d'exploitation, puisque la Société reçoit un financement distinct pour ses dépenses en immobilisations. Cependant, l'amortissement des immobilisations est déclaré séparément, strictement à des fins comptables, comme l'exigent les principes comptables généralement reconnus (PCGR). Par conséquent, cette dépense est comprise dans les « postes ne nécessitant pas des fonds d'exploitation courants » et elle est déduite au moment où on détermine le total des besoins d'exploitation de la Société pour l'exercice, en fonction du financement gouvernemental.

### *Recettes*

Comprend les recettes publicitaires, les ventes d'émissions, les recettes diverses et les recettes des services spécialisés (CBC Newsworld, le Réseau de l'information, Radio Canada International et Galaxie).

Objectifs

Encourager et promouvoir l'étude et la production d'œuvres d'art et leur appréciation et coordonner les activités de l'UNESCO au Canada et la participation du Canada aux programmes de l'UNESCO à l'étranger.

Objectifs

Bâtir une société forte où les Canadiens et les Canadiennes expriment leurs valeurs, participent et sont fiers de leur patrimoine.

Description des secteurs d'activité

Développement culturel et patrimoine

Développement culturel et patrimoine aide à créer un environnement où le patrimoine du Canada est préservé et rendu accessible, où l'expression artistique peut s'épanouir, où les marchés culturels peuvent se développer, assurant ainsi la disponibilité et l'accessibilité des arts, du patrimoine, et des produits et services de la radiodiffusion. Il y parvient grâce à une combinaison d'activités et de programmes variés, grâce aussi à des instruments et des institutions, notamment, des accords internationaux, des organismes culturels, des organismes de services spéciaux, des lois et des règlements.

Identité canadienne

Les Canadiens et les Canadiennes partagent une identité fondée sur des valeurs et des caractéristiques communes. Forts de la diversité de leurs langues, de leur patrimoine culturel, de leur origine ethnique et de leurs liens régionaux, ils ont une vision du Canada où chacun aide à bâtir une société fière et unie.

Identité canadienne favorise la connaissance et l'appréciation des institutions et des réalisations canadiennes, des symboles et des valeurs qu'ils représentent, de la dualité linguistique, du caractère multiculturel du Canada et de la contribution des Autochtones. Il favorise la participation des citoyens et le bénévolat, la justice sociale, la compréhension réciproque, les droits de la personne, l'apprentissage des deux langues officielles, l'excellence dans le sport et la reconnaissance des athlètes et la commémoration d'événements nationaux comme moyens de participer à l'édification d'un Canada fier et fort de son patrimoine.

Gestion intégrée

La Gestion intégrée fournit des avis, des services et des produits stratégiques associés à la planification stratégique et à la coordination des politiques; à la gestion financière; à la gestion des ressources humaines; à la gestion de l'information; aux communications et aux affaires publiques; aux examens ministériels; au soutien administratif et au soutien de l'exécution régionale des programmes. En outre, elle fait la promotion des activités de Patrimoine canadien grâce à la coordination avec les organismes du portefeuille, à des échanges actifs avec les organismes centraux, d'autres ministères fédéraux, les provinces, les territoires et la communauté internationale. Elle coordonne aussi la participation du Canada aux expositions internationales.

# Parlement Chambre des communes

## Caucus

La Chambre soutient les députés dans leurs rencontres avec divers groupes ainsi que dans leurs relations avec les membres de leur caucus. Ce domaine englobe le soutien offert aux bureaux de recherches des partis et aux agents supérieurs de la Chambre (président, vice-président, leaders à la Chambre, whips et leurs adjoints respectifs). Le statut de chaque député est conféré par la Constitution et la *Loi sur le Parlement du Canada*. Les règlements du Bureau de régie interne définissent avec plus de précision la latitude laissée aux députés dans divers domaines. Les composantes de ce secteur d'activité sont les suivantes :

- Rémunération additionnelle des agents supérieurs de la Chambre;
- Budget des bureaux de recherches, des chefs de parti et des autres bureaux des agents supérieurs de la Chambre, y compris les frais de personnel et les frais de fonctionnement;
- Autres frais relatifs au personnel;
- Coûts administratifs de l'institution pour l'appui à ce secteur d'activité.

## Institution

Ce secteur d'activité fournit les ressources pour le personnel administratif de la Chambre des communes. Les employés de la Chambre sont chargés de fournir des services aux députés élus pour une législature et, de plus, sont en permanence au service de la Chambre en tant qu'institution. Le Programme d'orientation destiné aux nouveaux députés permet de faire connaître aux nouveaux venus les règlements administratifs du Bureau de régie interne, les politiques administratives ainsi que les règles de procédure et les précédents établis par les législatures antérieures et qui serviront d'appui aux législatures futures. Le personnel de la Chambre s'efforce de toujours bien représenter l'institution et de soutenir le travail des députés dans leur rôle de représentants des 301 circonscriptions, à la Chambre, en comité et en caucus. Les fonds sont affectés à ce qui suit :

- Politique et gestion (Bureaux du greffier, du greffier adjoint, du sous-greffier et du sergent d'armes);
- Services financiers;
- Ressources humaines;
- Services de l'information;
- Services de sécurité;
- Tribune de la presse canadienne;
- Services des immeubles;
- Services de logistique;
- Services des télécommunications;
- Services postaux, de distribution et de messagerie;

L'administration de la Chambre des communes soutient les activités que les députés exercent individuellement et collectivement à titre de représentants de 301 circonscriptions, à la Chambre, en comité et en caucus.

Description des secteurs d'activité

Circonscription

Il s'agit ici des ressources servant à appuyer le rôle des représentants élus de 301 circonscriptions. À ce titre, les députés s'acquittent de leurs responsabilités de la même manière qu'ils le feraient pour l'exploitation de 301 petites entreprises. Ils reçoivent des services et du soutien conformément à la *Loi sur le Parlement du Canada*, aux règlements du Bureau de régime interne, au Règlement de la Chambre et aux décisions du Président. Les autres services qui soutiennent le travail des députés dans les circonscriptions sont également fournis conformément aux lignes directrices et aux normes établies par le Bureau. Les coûts sont répartis de la façon suivante :

- Traitements et allocations des députés, y compris la contribution au régime de pension de députés;
- Budget des bureaux des députés, y compris la rémunération du personnel, les dépenses de bureau et les déplacements dans la circonscription;
- Communication avec les commentateurs, y compris les frais de déplacement et de communications;
- Biens et services fournis par la Chambre;
- Autres frais relatifs au personnel;
- Coûts d'administration de l'institution attribuables au soutien de cette activité.

Chambre

Il s'agit ici des ressources servant à appuyer le rôle des représentants élus de la Chambre où ils exercent un droit de vote à titre de députés ou de membres du comité plénier. À la Chambre, les députés doivent se conformer au Règlement de la Chambre, à la procédure parlementaire, à la jurisprudence et aux décisions du Président qui sont sans appel. Dans l'exercice de ces fonctions, les députés ont besoin de toute une gamme de services, dont les suivants :

- Recherche et échanges parlementaires;
- Programme des pages;
- Journaux;
- Coûts administratifs de l'institution pour l'appui à ce secteur d'activité.

Comité

Ce secteur d'activité assure le financement des activités exercées par les députés au sein des comités permanents, des comités spéciaux ou mixtes et du Bureau de régime interne. Ce rôle est essentiel, car la Chambre des communes confie à ses comités l'étude approfondie de projets de loi ainsi que l'examen minutieux des programmes et politiques du gouvernement. Les députés font également partie d'associations parlementaires et de groupes d'amitié et se joignent à des délégations qui participent à des échanges parlementaires. Des conseils professionnels leur sont proposés sur des questions de fond qui touchent le travail de ces associations et les échanges, et des juristes leur prodiguent des avis et conseils concernant la formulation d'amendements aux projets de loi du gouvernement. Voici la liste des services soutenant ce secteur d'activité :

- Comités et associations parlementaires;
- Recherche et échanges parlementaires;
- Service des comptes rendus des comités, Service de l'index et des références, Service des publications;

## Description des secteurs d'activité

La Commission du droit du Canada réalise son mandat en favorisant des recherches pertinentes qui incitent directement les Canadiens à renouveler le droit. La Commission élabore et met en œuvre des programmes de recherche qui aideront à comprendre le rôle que le droit peut et doit jouer dans la société canadienne.

La Commission utilise diverses formules pour consulter les juristes et les Canadiens en général. En plus de publier et de distribuer des rapports, la Commission utilise d'autres médias et tribunes, notamment en diffusant les résultats de ses études par des moyens électroniques, en parrainant des congrès et des colloques, en organisant des conférences de presse et des assemblées publiques.

Les résultats des recherches et des consultations de la Commission sont résumés dans des documents publics qui font connaître ses conclusions et ses propositions. Occasionnellement, celles-ci peuvent prendre la forme de recommandations présentées au Parlement.

*Statistique du recensement de la population*

Ce secteur d'activité fournit des renseignements statistiques provenant du recensement quinquennal de la population. Ce dernier fournit des données repères sur la structure de la population canadienne et sur ses conditions démographiques, sociales et économiques. Il fournit les renseignements détaillés dont on a besoin sur les sous-populations et sur les petites régions géographiques, renseignements qui ne peuvent être fournis au moyen d'enquêtes par sondage. Les estimations de la taille de la population et de sa structure démographique intercenitaire ainsi que les projections démographiques s'appuient sur des données tirées du recensement.

Les chiffres de population et les estimations de la population permettent d'établir les limites des circonscriptions électorales, la distribution des paiements de transfert fédéraux et le transfert et la répartition des fonds entre les administrations régionales et municipales, les conseils scolaires et autres organismes locaux des provinces.

Objectifs

Produire des renseignements et des analyses statistiques sur la structure économique et sociale et sur le fonctionnement de la société canadienne comme base pour l'élaboration, l'application et l'évaluation des politiques et programmes publics et pour la prise de décisions dans les secteurs public et privé, de même que dans l'intérêt général de tous les Canadiens; promouvoir la qualité, la cohérence et la comparabilité sur le plan international du système statistique canadien en collaborant avec d'autres ministères et organismes fédéraux ainsi qu'avec les provinces et territoires, et en se conformant aux normes et pratiques scientifiques reconnues.

Description des secteurs d'activité

*Statistique économique et sociale*

La composante statistique économique de ce secteur d'activité fournit de l'information et des analyses sur la gamme complète des activités économiques du Canada, tant du point de vue national qu'international, par l'entremise d'un ensemble de statistiques macroéconomiques. La classification des statistiques économiques repose en grande partie sur l'infrastructure du Système des comptes nationaux du Canada. Ce système permet de mesurer la performance actuelle et la structure de l'économie canadienne selon le genre de transaction économique et le secteur. Il fournit des renseignements à jour et structureaux sur l'économie canadienne qui servent à étayer la formulation et le rajustement de politiques économiques budgétaires, monétaires et en matière de ressources humaines, de même que la formulation et le rajustement de politiques économiques industrielles et internationales. Le Système des comptes nationaux sert également de cadre de comparaison entre des séries statistiques particulières, afin d'en mesurer la fiabilité, et d'outil d'analyse permettant de cerner des changements quant à l'importance économique de divers secteurs.

Une autre composante de ce secteur d'activité porte sur les secteurs des entreprises, du commerce et du tourisme de l'économie canadienne. Il fournit notamment une mesure de la valeur de la production, des structures de coûts, des marchandises produites et consommées, des flux et des stocks de capital fixe utilisés dans l'économie, du degré d'utilisation de la capacité, des estimations des dépenses annuelles en capital prévues pour les entreprises et les administrations publiques, ainsi qu'une mesure de la fluctuation des prix des marchandises industrielles, des dépenses en capital et de la construction.

La composante statistique des ménages de ce secteur d'activité fournit de l'information sur les caractéristiques économiques et sociales des particuliers, des familles et des ménages au Canada, ainsi que sur les principaux facteurs qui contribuent à leur bien-être. Elle comprend la mesure des revenus et des dépenses des ménages, la mesure de l'emploi, du chômage, ainsi que des coûts et des avantages qui y sont reliés, de même que la mesure du revenu du travail et des facteurs qui influent sur la disponibilité de la main-d'œuvre. Elle fournit en outre de l'information sur des sujets d'intérêt donnés relativement à la politique sociale.

La composante statistique des institutions de ce secteur d'activité fournit de l'information et des analyses portant sur les installations, les organismes et les systèmes que subventionne l'État afin de répondre aux besoins socioéconomiques et physiques des Canadiens ainsi que sur les retombées des services qu'ils offrent. Elle englobe les systèmes de justice, de soins de santé et d'éducation, de même que les institutions et les industries culturelles. L'information qu'elle fournit porte sur la nature et l'étendue de leurs services et de leurs activités, et sur les caractéristiques des Canadiens et des familles à qui ils dispensent des services de même que sur l'influence qu'ils exercent sur la société canadienne. L'organisme tente de plus en plus d'aller au-delà de l'orientation institutionnelle de cette composante et d'illustrer comment les systèmes de soins de santé, d'éducation et de justice influent sur les Canadiens.

Objectifs

Encourager une normalisation volontaire, à la fois efficiente et efficace au Canada lorsque celle-ci ne fait l'objet d'aucune mesure législative en vue de faire progresser l'économie nationale, de contribuer au développement durable, d'améliorer la santé, la sécurité et le bien-être des travailleurs et du public, d'aider et de protéger les consommateurs, de faciliter le commerce intérieur et extérieur, et de développer la coopération internationale en matière de normalisation.

Description du financement par voie de crédits

*Conseil canadien des normes*

Paiements versés au Conseil canadien des normes pour les dépenses engagées dans le but d'atteindre ses objectifs : coordonner les activités des organismes canadiens s'occupant de l'élaboration de normes et de l'évaluation de la conformité; accrédiiter les organismes s'occupant de l'élaboration de normes et de l'évaluation de la conformité; entériner les Normes nationales du Canada; participer aux activités des organismes internationaux de normalisation à titre de représentant du Canada.

Description des secteurs d'activité

Politique microéconomique

Ce secteur d'activité définit les priorités et l'orientation d'ensemble du programme microéconomique du Ministère dans les quatre « volets » – climat du marché, commerce, technologie et infrastructure – présentés dans le document cadre du gouvernement « L'Innovation : La clé de l'économie moderne (ICEM) » conformément aux priorités énoncées dans le discours du Trône. Les principales difficultés à surmonter dans l'élaboration de la politique microéconomique consisteront à reconnaître les grandes tendances qui se manifestent, à réunir les indices analytiques permettant d'y réagir au moyen d'initiatives politiques appropriées et d'obtenir l'engagement d'un groupe divers de ministères et d'organismes faisant partie ou non du portefeuille de l'Industrie afin de les mettre en œuvre. Il faudra également intégrer une stratégie et des concepts de développement durable dans les activités du Ministère.

Règlements et services axés sur le marché

Le secteur d'activité ministériel, Règlements et services axés sur le marché, s'occupe d'une importante partie des mécanismes d'intervention du gouvernement destinés à maintenir l'efficacité et l'équité du marché, ce qui rehausse l'attrait du Canada aux yeux des investisseurs. Une vingtaine de lois délimitent le cadre décisionnel et législatif afférent au marché, notamment en ce qui touche à la concurrence, aux corporations et à la réglementation des entreprises, à la propriété intellectuelle, aux faillites, à l'inspection et à l'approbation des appareils de mesure, à l'inspection des produits de consommation, aux codes de pratique volontaires ainsi qu'à la délivrance de licences pour l'utilisation des fréquences radioélectriques et à la surveillance du spectre.

C'est par l'intermédiaire de ce secteur d'activité qu'Industrie Canada élabore, évalue et révisé les règles, règlements et normes régissant le fonctionnement équitable, efficace et concurrentiel du marché canadien. Ces règles permettent de soutenir et d'interpréter les lois régissant le marché qui sont élaborées dans le cadre de la gamme de services rattachée à la promotion d'un climat du marché sain dans le secteur d'activité que constitue la politique microéconomique. Dans le cadre des règlements et services axés sur le marché, le Ministère cherche en outre à maintenir la confiance des consommateurs et des entreprises en administrant efficacement les lois, règles, règlements et normes du marché et en veillant à aider les Canadiens à être plus concurrentiels sur les marchés mondiaux.

Les organismes qui jouent un rôle dans ce secteur d'activité aident également les entreprises et les consommateurs à contribuer et à profiter pleinement des règles régissant le marché et à mieux s'adapter à l'évolution de la conjoncture en offrant un vaste éventail d'informations et de services visant le marché.

Est compris dans ce secteur d'activité le fonds renouvelable de l'Office de la propriété intellectuelle du Canada. Le Parlement a autorisé un prélèvement total de \$15,000,000 au titre du fonds renouvelable de l'Office de la propriété intellectuelle du Canada à compter du 1<sup>er</sup> avril 1997. Voici comment il est prévu d'utiliser cette autorisation du Budget des dépenses :

Le tribunal d'appel et la Commission d'appel des pensions, qui travaillent de façon autonome, traitent les appels subséquents. Le secteur d'activité négocie et administre également les ententes internationales de sécurité sociale pour s'assurer que les migrants qui viennent au Canada, ainsi que ceux qui en sortent soient en mesure d'exercer les droits en matière de sécurité sociale qu'ils ont acquis dans les deux pays, dans la plus grande mesure possible.

Objectifs

L'objectif de Développement des ressources humaines Canada est de permettre aux Canadiens de contribuer pleinement à leur milieu de travail et à leur collectivité.

Description des secteurs d'activité

Investissement dans les ressources humaines (IRH)

Ce secteur d'activité porte sur :

- la promotion de la transition et de la réintégration au marché du travail, et des liens avec celui-ci;
- l'acroissement de la capacité du secteur privé et des organismes bénévoles à promouvoir le développement de la personne;
- la promotion de l'apprentissage et de l'acquisition de compétences;
- la promotion de l'insertion sociale afin de permettre à tous de jouer un rôle au sein du marché du travail et de la collectivité, en accordant la priorité aux enfants, aux jeunes à risque, aux travailleurs âgés, aux Autochtones et aux personnes handicapées.

Ces objectifs seront atteints, en partie, en adoptant une approche intégrée et horizontale en matière de développement de la personne et en insistant sur les mesures préventives telles que la formation et le renforcement des partenariats de DRHC avec les entreprises du secteur privé et les organismes bénévoles.

Le secteur d'activité d'IRH comprend des subventions, des contributions, des prêts et des programmes prévus par la loi ainsi qu'une gamme de services d'information, de coordination et de consultation conçus pour offrir des programmes et des services de haute qualité. Les activités d'IRH sont conçus pour aider les canadiens à apprendre, à gérer les changements qui surviennent dans leur vie et à développer leur potentiel. Elles le feront en aidant tant les individus que les entreprises, les collectivités et les secteurs industriels et professionnels à déterminer et à répondre à leurs besoins en matière de développement personnel, social et professionnel.

Le public peut également accéder à de l'information ainsi qu'à des renseignements concernant l'acquisition de compétences et les possibilités d'emploi, la création d'emplois et le marché du travail, par le truchement de DRHC ou des partenariats conclus avec les provinces et les territoires, les organisations autochtones et les organismes des secteurs privé ou communautaire. De l'aide financière peut aussi être mise à la disposition des particuliers pour qu'ils atteignent leurs objectifs sur le plan du développement personnel.

Prestations de revenu de l'assurance-emploi

Ce secteur d'activité est axé sur l'administration du programme de l'assurance-emploi, y compris le traitement des appels, l'émission de numéros d'assurance sociale, l'administration du registre d'assurance sociale et le versement de rentes gouvernementales.

Travail

Ce secteur d'activité comprend quatre secteurs de service :

Le secteur des relations industrielles a pour objectif d'aider à régler les conflits entre les employeurs, les syndicats et les travailleurs qui relèvent de la compétence fédérale et d'appuyer et de financer les initiatives patronales-syndicales en matière de collaboration sur les questions touchant le milieu de travail tout en effectuant des recherches sur les priorités actuelles et nouvelles relatives aux relations industrielles.

Le secteur des opérations du travail encourage le client à accepter les programmes obligatoires et législatifs du fédéral conçus pour instaurer un milieu de travail juste, sans danger, sain et équitable. En outre, il règle les cas de non-conformité à ces programmes.

Le secteur de l'indemnisation fédérale des accidents, par des ententes administratives conclues avec les autorités provinciales en matière d'indemnisation des accidents de travail, assure aux personnes admissibles l'octroi des prestations prévues par la loi sur les blessures subies au travail.

Description des secteurs d'activité

*Fournir des opinions et des informations objectives touchant l'état du débat sur l'environnement et l'économie*  
La TRNEB est un organisme multilatéral composé d'un président et d'un maximum de 24 membres qui sont des leaders d'opinion issus de différentes régions et divers secteurs de la société canadienne, dont le monde des affaires, les syndicats, l'enseignement, les organismes de protection de l'environnement et les Premières nations. La TRNEB préconise fortement la méthode multilatérale et la formule de la table ronde pour analyser les problèmes de développement durable, et elle sert de forum où tous les points de vue peuvent être librement exprimés et débattus. Les membres et les participants de la TRNEB qui sont engagés dans ses programmes s'efforcent de définir le rapport entre l'environnement et l'économie, aux fins de déterminer les points sur lesquels il y a entente quant aux solutions à adopter, et de signaler tout obstacle au consensus. Ces informations sont ensuite rassemblées, évaluées et communiquées aux intervenants, aux décideurs intéressés et aux médias.

La TRNEB répartit ses activités entre plusieurs programmes. Le thème d'un programme éventuel fait l'objet d'une orientation et d'une définition, et un groupe de travail est chargé de superviser les activités qui s'y rattachent. Les problèmes nouveaux sont soumis à un examen constant et, s'ils sont considérés comme une priorité, ils donnent naissance à un nouveau programme lorsque les fonds nécessaires sont disponibles.

#### *Commissions d'enquête et groupes de travail*

Le secteur d'activité, Commissions d'enquête et groupes de travail, se rapporte au financement, au besoin, de commissions d'enquête nommées pour faire des recommandations sur des sujets donnés et de groupes de travail et autres personnes ou organismes qui doivent exercer leurs activités de façon indépendante du Bureau du Conseil privé, tout en recevant tout de même le niveau approprié de services administratifs du Ministère.

En raison de leur caractère indépendant et aux fins de l'administration, les commissions d'enquête établies en vertu de la *Loi sur les enquêtes* font partie du programme du Conseil privé.

#### *Services ministériels*

Le secteur d'activité, Services ministériels, faisant partie du programme du Conseil privé se rapporte à la prestation régulière et permanente de services administratifs et aussi de services spécialisés que l'on n'offre pas dans d'autres ministères. Les Services spécialisés comprennent les coûts du fonctionnement du standard téléphonique du Premier ministre, une unité de correspondance chargée de la correspondance non politique et non personnelle adressée au Premier ministre, et s'il y a lieu, à d'autres ministres du portefeuille, ainsi que le soutien technique associé aux déplacements des membres du Cabinet du Premier ministre. En outre, le secteur d'activité comporte certains services administratifs rendus aux commissions d'enquête et aux groupes de travail.

En outre, sont reliés à ce secteur d'activité les salaires et allocations pour automobile des secrétaires d'Etat qui aident les ministres du Cabinet à assumer leurs responsabilités. Objectifs

Offrir aux producteurs de lait et de crème qui sont efficaces l'occasion d'obtenir une juste rétribution de leur travail et de leur investissement, et assurer aux consommateurs de produits laitiers un approvisionnement continu et suffisant de produits laitiers de bonne qualité.

Description du financement par voie de crédits

*Administration et opérations*  
La Commission canadienne du lait est autorisée à acheter, à entreposer, à transformer et à écouler des produits laitiers; à effectuer des paiements aux producteurs de lait et de crème dans le but de stabiliser le prix du lait de transformation et de la crème; à faire des recherches sur toute question relative à la production, à la transformation et à la mise en marché de tout produit laitier; à participer à la promotion des produits laitiers; et à recevoir des fonds pour l'administration de ses programmes. La Commission canadienne du lait détermine les prix de soutien selon lesquels elle fera l'achat de beurre et de poudre de lait écrémé. Ces prix servent de référence à l'échelon provincial pour l'établissement des prix des composants du lait vendus aux transformateurs. La Commission travaille aussi en étroite collaboration avec les provinces en fournissant un leadership soutenu et son appui technique au Comité canadien de gestion des approvisionnements de lait, un comité mixte du gouvernement et de l'industrie qui coordonne la gestion de l'offre du lait de transformation et de la crème sur une base nationale.

Le financement des coûts de mise en marché et d'administration de la Commission provient du gouvernement du Canada, des producteurs et du marché.  
La Commission administre le programme du gouvernement fédéral de paiement mensuel de subsides aux producteurs admissibles. Au nom de l'industrie, la Commission exporte surtout du beurre, du lait évaporé et des poudres de lait directement à d'autres gouvernements et contribue à l'administration des programmes de commercialisation tels que le Programme d'innovation en matière de produits laitiers et le Programme optionnel d'exportation. La Commission est également responsable des dépenses des commissaires et des soixante-dix membres du personnel administratif requis pour gérer ses activités au nom du secteur laitier.  
Au nom des producteurs laitiers, la Commission administre le Système de permis et de mise en commun du lait de la classe 5.

*Saine gestion ministérielle*  
Ce secteur d'activité réunit les politiques et l'infrastructure ministérielles dont AAC a besoin pour remplir son mandat envers les Canadiens de la façon la plus efficace et la plus efficiente possible, tout en créant pour ses employés un milieu de travail positif. Les activités de gestion dans des domaines comme les ressources humaines, les finances et l'administration, les communications et l'examen des programmes sont l'apanage de ce secteur, mais il incombe en fait à tous les employés de renforcer la capacité d'AAC d'obtenir des résultats au profit du secteur agricole et agroalimentaire et des contribuables canadiens.

Le Parlement a autorisé précédemment un prélèvement de \$2,000,000 au titre du fonds renouvelable de l'Agence canadienne du parti mutuel. Voici comment il est prévu d'utiliser cette autorisation du Budget des dépenses :

Objectifs

Notre objectif est de promouvoir et d'appuyer, de façon durable, une industrie agricole et agroalimentaire en pleine croissance, concurrentielle et axée sur les marchés et de promouvoir également le développement économique en pleine collectivité rurale.

Description des secteurs d'activité

*Croissance des marchés*

Par son secteur d'activité, Croissance des marchés, Agriculture et Agroalimentaire Canada (AAC) fait la promotion de l'accès aux marchés, du développement des marchés et des investissements. Ce secteur d'activité réunit les activités du Ministère et des organismes du portefeuille et contribue de façon dynamique à Équipe Canada - un réseau canadien de promotion du commerce international qui aide les compagnies canadiennes à vendre leurs produits et leurs services dans le monde entier et à promouvoir l'investissement au Canada. La Croissance des marchés vise à améliorer et à garantir l'accès aux marchés, afin d'offrir aux clients des possibilités d'accroissement du commerce, particulièrement des produits agroalimentaires transformés, sur les marchés nationaux et internationaux. Elle vise également à créer de nouveaux débouchés commerciaux, à assurer une plus grande disponibilité des marchés dans le secteur agricole et agroalimentaire canadien, et à aider l'industrie à attirer de nouveaux investissements en préparant la voie pour un meilleur climat d'investissement dans le secteur et ainsi améliorer notre capacité de fournir des produits de compétitivité mondiale.

*Innovations pour un avenir durable*

Le secteur d'activité, Innovations pour un avenir durable, touche les activités de recherche et de développement, ainsi que celles de transfert de technologie d'Agriculture et Agroalimentaire Canada. Ce secteur d'activité contribue activement à réduire les coûts de production et de transformation des produits agricoles et agroalimentaires, à améliorer la qualité et la sécurité de ces produits, de même qu'à concevoir et à promouvoir des pratiques de production et de transformation qui sont sécuritaires et durables pour l'environnement. Ce secteur d'activité touche également la participation directe aux programmes axés sur la conservation et la gestion des ressources agricoles. Un élément majeur est la promotion d'une meilleure compréhension des questions environnementales qui touchent le secteur et l'élaboration de politiques et de programmes appropriés qui appuient un environnement durable à long terme. Ce secteur d'activité poursuit ses objectifs par le truchement d'un important réseau de centres de recherches et d'autres installations de la Direction générale de la recherche, en travaillant de pair avec l'Administration du rétablissement agricole des Prairies (ARAP), la Direction générale des politiques (le Bureau de l'environnement), les provinces, les universités, les collectivités du secteur de l'agriculture et le secteur privé.

*Fondation solide pour le secteur et les collectivités rurales*

Ce secteur d'activité comprend les activités ministérielles qui rehausseront la viabilité économique et l'autonomie du secteur agricole et agroalimentaire et qui font la promotion du développement économique des collectivités rurales. Ces activités comprennent les programmes nationaux de sécurité du revenu qui s'occupent de la gestion des risques de production et de commercialisation, les initiatives qui aident le secteur à s'adapter à un climat commercial en pleine évolution, les politiques de réglementation et d'encadrement surtout en ce qui a trait au secteur des grains et aux secteurs soumis à la gestion de l'offre et la promotion du secteur des coopératives et du développement de l'infrastructure des Prairies. Ce secteur d'activité comprend aussi des initiatives qui font en sorte que les programmes, les avantages et les services fédéraux sont autant accessibles dans les régions rurales que dans les autres.

Objectifs

L'objectif du programme de la Section canadienne du Secrétariat de l'ALENA consiste à mettre en application les dispositions de règlement des différends de l'Accord de libre-échange nord-américain (ALENA), de l'Accord de libre-échange Canada-Israel et de l'Accord de libre-échange Canada-Chili, en appuyant les groupes spéciaux mis sur pied en vertu de chacun des accords et en maintenant un système de greffe de type judiciaire où seront déposées les procédures des groupes spéciaux, des comités et des tribunaux établis aux termes de chacun des accords.

Description des secteurs d'activité

Secretariat de l'ALENA, section canadienne

Afin de régler les différends résultant de décisions finales sur le dumping, les droits compensateurs et le préjudice, on peut substituer à l'examen judiciaire la procédure de révision par groupe spécial prévue au chapitre 19 de l'ALENA. Les différends sur l'interprétation et l'application de l'ALENA (chapitre 20) peuvent être renvoyés à un groupe spécial de cinq membres. Les différends concernant les dispositions de l'ALENA sur l'investissement (chapitre 11) et sur les services financiers (chapitre 14) peuvent être soumis au mécanisme de règlement prévu par l'Accord.

La Section canadienne s'occupera de régler les différends aux termes des dispositions de règlement des différends du chapitre 8 de l'Accord de libre-échange Canada-Israel et du chapitre N de l'Accord de libre-échange Canada-Chili. Pour l'administration des dispositions sur le règlement des différends, la Section canadienne du Secrétariat de l'ALENA fournit des services juridiques, professionnels et consultatifs aux groupes spéciaux et aux comités, administre un greffe et coordonne tous les aspects financiers du processus.

Le Secrétariat fournit aussi, au besoin, une aide aux Commissions et appuie les divers comités et groupes de travail non liés au règlement des différends.

Par ses activités de communications, l'Agence souhaite montrer à des publics choisis, dont les jeunes, les décideurs et les façonneurs de l'opinion, que l'ACDI est un organisme d'aide efficace. Elle veut sensibiliser d'abord les Canadiens au développement international et à ses impacts et renforcer la collaboration avec les partenaires nationaux et internationaux en matière de communications. La Direction générale est responsable de l'application de la politique de l'ACDI en matière de communications.

Avec le programme d'information sur le développement, la Direction des communications travaille en collaboration avec les particuliers, les organismes non gouvernementaux et le secteur privé afin d'informer les Canadiens des programmes et des questions connexes de développement, en mettant particulièrement l'accent sur l'importance du rôle et de la contribution que les Canadiens apportent dans les pays en développement.

#### Services généraux

Les Services généraux fournissent à l'Agence des services de soutien qui ne sont pas directement liés à un mécanisme d'exécution en particulier. Ces services sont assurés par les Services à la haute direction de l'Agence, ainsi que par la Direction générale des ressources humaines et services corporatifs et la Direction générale de l'examen du rendement. Leur coût est comptabilisé comme une dépense administrative indirecte plutôt que comme une dépense directe qui peut être facilement imputée à un mécanisme d'exécution.

La Direction générale des programmes multilatéraux vise aussi à améliorer les politiques et pratiques des institutions multilatérales, plus particulièrement pour la coordination des initiatives au niveau des pays, et pour le suivi et l'évaluation des activités sur le terrain. L'accroissement de l'efficacité des organisations internationales est un élément important des programmes multilatéraux.

#### *Partenariat canadien*

Le Programme de partenariat canadien verse des subventions et des contributions à des organisations canadiennes et internationales pour appuyer leurs activités dans les pays en développement. Il soutient les initiatives de ces organisations (à but lucratif et à but non lucratif) et vise l'établissement de partenariats durables entre le Canada et les pays en développement par l'entremise de projets à coûts partagés. En outre, la Direction générale du partenariat canadien est responsable de la politique en matière de consultations et représente l'Agence dans les relations et les consultations avec les partenaires.

Le Programme de partenariat canadien comporte trois sous-programmes principaux, à savoir le Soutien au secteur bénévole, la Coopération industrielle et les Bourses. Le Programme de coopération industrielle (PCI) encourage les initiatives de développement du secteur privé et favorise la croissance économique dans les pays en développement en appuyant l'établissement de liens à long terme et mutuellement avantageux entre le secteur privé canadien et les pays bénéficiaires.

Le Programme de soutien au secteur bénévole est axé sur le développement communautaire et le renforcement de la capacité des organisations et institutions des pays en développement afin de promouvoir un développement durable dans des secteurs socio-économiques clés. Il favorise la création de liens entre les ONG au Canada et dans les pays en développement, et appuie les organisations et institutions canadiennes qui œuvrent aux niveaux de l'environnement, de la réforme du secteur public, des droits de la personne, de la démocratie et du bon gouvernement afin de promouvoir le transfert de technologie et le renforcement des capacités.

Le Programme de bourses est chargé de gérer différents programmes, ainsi que les règlements et politiques régissant la sélection et le recrutement des coopérateurs et experts en assistance technique et des stagiaires au pays.

#### *Politiques*

La Direction générale des politiques élabore et tient à jour les politiques de l'ACDI dans le cadre de l'objectif et des priorités de l'APD, ainsi que des intérêts et des objectifs de la politique étrangère du Canada. Elle fournit au Ministre, à l'ACDI et à d'autres ministères des conseils et de l'information sur les questions de politiques et de stratégies, ainsi qu'une expertise scientifique et technique. Il arrive également qu'elle vérifie le respect des normes à l'ACDI, comme dans le cas des évaluations environnementales. La Direction générale gère également les consultations sur les questions stratégiques avec des groupes d'intérêt et le grand public.

La Direction générale gère l'Enveloppe de l'aide internationale et les fonds alloués au nom de l'ACDI. Elle gère également la bibliothèque et la documentation de l'Agence, ainsi que plusieurs bases de données nationales et internationales. Elle produit l'information générale requise pour la rédaction des rapports nationaux et internationaux sur les dépenses au titre de l'APD.

À l'échelle internationale, la Direction générale des politiques veille à coordonner les politiques de développement du Canada et celles d'autres pays donateurs, par exemple de concert avec le Comité d'aide au développement de l'Organisation de coopération et de développement économiques (OCDE). Elle représente également les intérêts du Canada aux réunions internationales et veille à ce que les politiques en matière de développement tiennent compte des engagements internationaux pris par le Canada.

#### *Communications*

Conformément à la stratégie du gouvernement en matière de communications, la Direction générale des communications aide le Ministre, la Présidente et les directions générales de l'ACDI à s'acquitter de leurs responsabilités à ce niveau. Elle fournit des conseils d'experts, procède à des recherches sur l'opinion publique et à l'analyse des reportages, et produit des documents imprimés et audiovisuels.

Objectifs

Encourager les efforts des peuples des pays en développement et des pays en transition en vue d'un développement économique et social autonome compatible avec leurs besoins et leur environnement, en collaborant avec eux à la réalisation d'activités de développement et accorder une aide humanitaire pour favoriser les intérêts politiques et économiques du Canada à l'étranger grâce à la promotion de la justice sociale, de la stabilité internationale et des relations économiques à long terme, au profit de la communauté mondiale.

Description des secteurs d'activité

*Programmes géographiques*

Les programmes géographiques comportent des relations directes entre le gouvernement du Canada et les gouvernements des pays en développement. Ils sont élaborés en consultation et en collaboration avec les partenaires de ces pays. Ils constituent le principal mécanisme de soutien qu'utilise le gouvernement pour investir à long terme dans des secteurs essentiels du développement durable. Les programmes géographiques représentent environ le tiers du budget de l'aide internationale.

Les projets financés tiennent compte des besoins des pays en développement et de la capacité du Canada de répondre à ces besoins. La valeur des projets, et celle des contrats et des accords de contribution nécessaires à leur exécution, va de milliers de dollars à des dizaines de millions. L'approche et l'objet des projets varient aussi considérablement. À de rares exceptions près, l'aide consentie dans le cadre des programmes géographiques est versée en nature directement par les fournisseurs et agents d'exécution canadiens ou par l'entremise des achats effectués par les pays bénéficiaires, dans le cadre des politiques canadiennes d'aide liée (fonds alloués pour l'achat de biens et de services au Canada) et conformément aux exigences quant au contenu canadien.

Trois directions de programmes géographiques, à savoir les directions générales de l'Afrique et du Moyen-Orient, de l'Asie et des Amériques, se chargent de planifier et de fournir l'aide bilatérale canadienne aux pays admissibles. Les programmes mis en œuvre dans ces régions sont fondés sur l'objectif et les six volets prioritaires de l'aide publique au développement (APD).

*Pays en transition*

Le programme de l'Europe centrale et de l'Est (ECE) est conçu pour répondre aux initiatives et pour aider les pays de la région pendant la période critique de transition. Une petite part de l'aide fournie au moyen de ce programme relève de l'APD. Le programme permet de transférer des connaissances et les compétences aux pays de la région grâce au perfectionnement des ressources humaines, au renforcement des institutions, à l'assistance humanitaire et multilatérale, aux conseils en matière de politiques. Les activités sont mises en œuvre en collaboration avec le secteur privé, les organisations non gouvernementales (ONG), les milieux universitaires, les communautés ethniques et tous les paliers de gouvernement au Canada. Ces partenariats servent de catalyseurs pour susciter, au niveau des projets, des contributions tant chez les partenaires canadiens que chez les partenaires des pays bénéficiaires.

*Programmes multilatéraux*

Dans le cadre des programmes multilatéraux, l'Agence canadienne de développement international (ACDI) collabore avec une vaste gamme d'organisations et d'institutions internationales, dont les agences des Nations Unies (comme l'UNICEF), le Commonwealth et la Francophonie, et les banques de développement régionales pour l'Afrique, l'Asie, l'Amérique latine et les Caraïbes. La plus grande partie de l'aide humanitaire et des secours d'urgence fournis par l'ACDI est achevinée par l'intermédiaire des programmes multilatéraux.

L'ACDI emploie différents mécanismes pour obtenir des résultats dans les six secteurs prioritaires. De concert avec d'autres organismes donateurs, elle fournit un financement de base à des organisations et institutions multilatérales œuvrant dans ces secteurs. Elle cherche également à influencer sur les pratiques et politiques de ces organisations afin de maximiser l'efficacité des programmes et des opérations. De plus, elle surveille et évalue le rendement des organisations et institutions internationales et fait rapport sur ce rendement.

\*Ce secteur d'activité est financé au moyen d'un fonds renouvelable. Les prévisions de dépenses qui figurent dans ce tableau renvoient aux besoins de trésorerie du fonds pour l'exercice. Elles ne reflètent pas directement le bénéfice ou le déficit de fonctionnement que produira le fonds puisque celui-ci fonctionne selon la méthode de la comptabilité d'exercice. Par conséquent, certains décaissements inscrits dans le Budget des dépenses n'influent pas sur le solde de fonctionnement, et certains autres éléments qui doivent être pris en considération dans le calcul du bénéfice ou du déficit ne nécessitent pas de dépenses directes en espèces. Ces deux types de dépenses peuvent être rapprochés de la façon suivante :

Déficit de fonctionnement prévu	2,700
Plus :	
Éléments hors caisse compris dans le calcul du déficit de fonctionnement	5,920

Dépenses en argent non comprises dans le calcul du déficit de fonctionnement :

Un nouveau crédit législatif a été ajouté comme suit : « Paiements aux agences privées de recouvrement en vertu de l'article 17.1 de la Loi sur la gestion des finances publiques ». Cette section comprend deux volets. Comme par les années passées, elle décrira les changements survenus en ce qui concerne la présentation des crédits, des programmes et d'autres éléments, afin de permettre de rapprocher le Budget principal des dépenses de 2000-2001 et celui de 1999-2000. De plus, cette section exposera en détail les crédits qui renferment une autorisation précise, distincte de celle qui est incluse dans le Budget principal des dépenses de l'année précédente, ainsi que les nouvelles autorisations de dépenses paraissant pour la première fois. Compte tenu des décisions rendues par le président de la Chambre des communes en 1981, le gouvernement s'est engagé à faire en sorte que les seules mesures législatives qui seront modifiées dans le cadre du Budget des dépenses, sauf dans les cas expressément autorisés par voie de législation, seront les lois de crédits précédentes.

### Modifications concernant les organisations gouvernementales et la structure :

**Agriculture et Agroalimentaire – Commission canadienne des grains** – La Commission, qui auparavant faisait partie du ministère, est inscrite pour la première fois comme une entité distincte dans le Budget principal des dépenses. Son objectif est « d'Offrir un régime d'assurance-qualité qui valorise la commercialisation du grain au bénéfice des producteurs. »

**Revenu national** – Avec l'adoption du projet de loi C-29, le nom du ministère a été remplacé par *Agence des douanes et du revenu du Canada*. Le titre du ministre reste le même, soit « ministre du Revenu national ».

### Modifications concernant les autorisations (crédits) :

**Affaires étrangères et Commerce international – Agence canadienne de développement international** – Le niveau des dépenses en capital de cet organisme a chuté sous le seuil des 5 millions de dollars; en conséquence, il ne sera pas nécessaire de prévoir un crédit distinct pour les dépenses en capital dans le Budget principal des dépenses de 2000-2001.

Le libellé du crédit L30 est modifié comme suit : « Emission et paiement de billets à vue, non productifs d'intérêts et non négociables, dont le montant ne doit pas dépasser 136 000 000 \$, conformément à la Loi d'aide au développement international (institutions financières), à titre de contributions aux fonds d'institutions financières internationales. »

Le libellé du crédit L35 est modifié comme suit : « Emission et paiement de billets à vue, non productifs d'intérêts et non négociables, dont le montant ne doit pas dépasser 11 178 000 \$ US conformément à la Loi d'aide au développement international (institutions financières), à titre de souscriptions au capital des institutions financières internationales. »

**Affaires indiennes et du Nord canadien – Ministère** – Le libellé du crédit régissant les dépenses de fonctionnement du « Programme des affaires du Nord » est modifié comme suit : « ... rendus au nom des gouvernements des Territoires, y compris l'autorisation ... ». De plus, les crédits « Prêts aux Anciens du Yukon » et « Prêts aux Premières nations de la Colombie-Britannique pour les aider à participer au processus de la Commission des traités de la Colombie-Britannique » ont été supprimés parce qu'il n'existe aucun besoin financier dans le Budget principal des dépenses de 2000-2001.

**Agence des douanes et du revenu du Canada** – Un nouveau crédit législatif a été ajouté comme suit : « Dépenses des recettes résultant de la poursuite des opérations en vertu de l'article 60 de la Loi sur l'Agence des douanes et du revenu du Canada ».

**Agriculture et Agroalimentaire – Ministère** – Trois nouveaux crédits législatifs ont été ajoutés comme suit : « Paiements relatifs à la Loi sur la protection du revenu agricole - Programmes de transition pour les viandes rouges », « Paiements relatifs à la Loi sur la protection du revenu agricole - Programme d'innovation en agroalimentaire », et « Paiements relatifs à la Loi sur la protection du revenu agricole - Fonds de développement Canada/Nouvelle-Écosse pour le secteur pomicole ». Un nouveau crédit budgétaire a été ajouté comme suit : « Aux termes de l'article 29 de la Loi sur la gestion des finances publiques, autoriser le ministre d'Agriculture et Agroalimentaire Canada, au nom de Sa Majesté du chef du Canada et conformément aux conditions approuvées par le ministre des Finances, à garantir le paiement d'un montant ne dépassant pas en totalité et en tout temps, la somme de 1 700 000 000 \$ payable sous la forme d'avances de fonds fournies

Et, les Recettes à valoir sur le crédit. (Dans certaines situations données, le Parlement autorise les ministères ou organismes à dépenser les recettes tirées de leurs opérations de la même manière que les fonds affectés au moyen du crédit. Ces sommes compensent les dépenses prévues à l'égard des articles courants 1 à 12, qui sont indiqués en chiffres bruts).

Des modifications aux systèmes d'information financière du gouvernement sont à l'origine des changements effectués au contenu de plusieurs articles courants de dépense. Ces modifications ont touché un nombre restreint de ministères en 1999-2000; cependant cette année plus de ministères seront touchés. La modification la plus importante est assurément celle relative aux articles courants 8 et 9 où toute mention au terme « construction » a été enlevée.

Une brève explication de chaque article courant est donnée dans ce qui suit.

1. *Personnel*

Traitements et salaires, rétribution des heures supplémentaires, indemnité de cessation d'emploi, salaire rétroactif et autres rémunérations spéciales de tout le personnel civil permanent (à temps plein) ou engagé pour une période déterminée (à temps partiel, saisonnier ou occasionnel), à l'exclusion des employés des sociétés d'Etat mandataires et propriétaires, ainsi que les membres des forces militaires et de la GRC. Traitements des juges, du gouverneur général et des lieutenants-gouverneurs, ainsi que les indemnités des membres des deux chambres du Parlement, et tout genre d'indemnité versée au personnel permanent ou engagé pour une période déterminée ou à leur intention : indemnités de subsistance, suppléments provisoires, indemnités de service à l'étranger, indemnités d'isolement, indemnités de pension et de subsistance, primes de postes, et autres allocations du genre. Y figurent aussi les allocations pour automobile aux ministres et les indemnités de dépenses aux sénateurs et aux députés.

Contributions de l'état à divers régimes d'avantages sociaux des employés (compte de pension de retraite de la fonction publique, compte de prestations de retraite supplémentaires, compte du Régime de pensions du Canada, Régime des pensions du Québec, compte de prestations de décès de la fonction publique et compte d'assurance-emploi), au compte de pension de retraite de la Gendarmerie royale du Canada, au compte de pension de retraite des Forces canadiennes et au compte d'allocations de retraite des membres du Parlement; et les contributions de l'état aux régimes provinciaux et autres régimes d'assurance médicale et d'assurance-hospitalisation; y figurent aussi les frais de personnel supplémentaire pour diverses fins.

2. *Transports et communications*

Frais de voyage et de transport d'employés du gouvernement, de membres des Forces armées et de la Gendarmerie royale du Canada; frais de réinstallation de ces personnes à leur charge, ainsi que frais de subsistance et autres frais payés par ces personnes en voyage commandé; dépenses de voyage des juges; dépenses et indemnités de voyage payables aux sénateurs et aux députés. Y figurent aussi le transport de personnes par contrat, nolement ou autres moyens, y compris les frais de voyage de personnes qui s'occupent d'arpentages, d'inspections et d'études sur le terrain. Sont aussi compris les frais de déplacement et de transport de personnes qui ne sont pas des employés de l'état, comme les frais de transport d'anciens combattants demandant des traitements ou des pensions.

Affranchissement ordinaire, courrier aérien, recommandé, colis postal, courrier exprès, ainsi que location de cases postales et tous autres frais postaux. Frais de transport de marchandises, autres que le coût initial de livraison, à l'égard d'un achat

Fonds renouvelables

Un fonds renouvelable constitue une autorisation permanente ou continue donnée par le Parlement en vue d'effectuer des paiements sur le Trésor jusqu'à concurrence d'une limite déterminée. En vertu de cette autorisation, les besoins de fonds peuvent être compensés, dans la mesure du possible, par les recettes produites.

Un fonds renouvelable peut servir à financer des programmes, des activités de programmes ou des parties de ces activités. Le tableau Programme par secteur d'activité s'accompagne de notes qui montrent le revenu ou le déficit de fonctionnement prévu en rapprochant ce solde des besoins de trésorerie indiqués dans le Budget des dépenses et en renvoyant au **rapport sur les plans et les priorités** ceux qui désirent plus de renseignements.

Sociétés d'Etat

Le principe général appliqué dans la **Partie II** du Budget des dépenses est de donner des renseignements sur les opérations financées par voie de crédits plutôt que sur l'ensemble du plan financier des sociétés. Les sommaires des plans d'entreprise et des budgets des sociétés, qui sont déposés séparément, visent à fournir aux parlementaires des renseignements plus complets en prévision de l'examen des dépenses des sociétés d'Etat qu'ils feront.

Une présentation distincte s'applique aux sociétés d'Etat pour lesquelles des crédits sont demandés. Cette présentation comprend les trois sections normalisées suivantes :

- a) *Objectif* – Cette section décrit l'objectif de la société d'Etat.
- b) *Description du financement par voie de crédits* – Cette section décrit les principales entreprises et activités auxquelles le financement est destiné. Elle décrit aussi les principales catégories de dépenses.
- c) *Sommaire du financement par voie de crédits* – Ce tableau donne des précisions sur les besoins financiers qui doivent être satisfaits au moyen de crédits. Les présentations peuvent varier selon les circonstances propres à chacune des sociétés et selon les renseignements fournis dans le sommaire de leur plan d'entreprise et de leur budget, et dans leur état financier annuel. La présentation précise de façon distincte :
  - i) le financement budgétaire et le financement non budgétaire, selon les principales entreprises et activités de la société ;
  - ii) le montant du financement budgétaire nécessaire à l'exploitation, ainsi qu'à l'acquisition d'immobilisations et d'autres éléments d'actif à long terme ;
  - iii) les dépenses prévues, les recettes et les ajustements, hors caisse ou autres, permettant de justifier les fonds de fonctionnement demandés.

Définitions des articles courants de dépense

Afin d'indiquer de façon plus précise l'incidence des recettes et des dépenses fédérales sur l'économie, il faut établir le montant net des achats et des ventes de l'Etat par article courant. A cette fin, tous les ministères, y compris ceux qui ont recours à un fonds renouvelable, doivent inscrire comme un débit aux articles courants 1 à 12 leurs dépenses d'achats auprès de fournisseurs externes. Les articles courants sont le niveau le plus élevé de la classification par article qu'utilisent le Parlement et le pouvoir exécutif, ils figurent dans le Budget des dépenses et les Comptes publics.

Toutes les données du Budget des dépenses indiquées pour l'année précédente proviennent du Budget principal des dépenses de cette année budgétaire. On fait ainsi en sorte que toutes les données financières soient présentées de façon uniforme d'une année à l'autre, pour tous les ministères et organismes et dans le Budget principal des dépenses de l'année en cours. Au besoin, les montants de l'année budgétaire précédente sont rajustés en fonction des changements survenus dans la structure des organisations ou des programmes, notamment des changements dans les responsabilités ministérielles, afin de permettre des comparaisons pertinentes.

En général, la présentation de chaque programme se compose de quatre sections, lesquelles sont indiquées ci-après. Si l'une d'elles ne s'applique pas à un programme donné, elle est omise.

*Objectifs*

Cette section expose les objectifs de chaque programme.

*Description du secteur d'activité*

Cette section sert à expliquer le programme en décrivant le travail qui se fait dans chaque secteur d'activité pour atteindre les objectifs du programme.

*Programme par secteur d'activité - tableau*

Ce tableau indique l'ensemble des ressources financières qu'il est proposé d'engager au titre du programme. Les montants des crédits votés et des autorisations législatives sont combinés et répartis entre les secteurs d'activités de chaque programme. Les dépenses de chaque secteur d'activité sont présentées sous les rubriques Fonctionnement, Dépenses en capital, Paiements de transfert (subventions et contributions) et Prêts, placements et avances. Les recettes à valoir sur le crédit, pour les ministères et organismes autorisés à le faire, ainsi que les recettes associées aux fonds renouvelables sont également incluses dans ce tableau.

Les rentrées des recettes générales non fiscales et les services fournis gracieusement par d'autres ministères fédéraux sont présentés dans le **rapport sur les plans et les priorités**.

*Paiements de transfert*

Ce tableau fournit des précisions sur les paiements de transfert qu'il est proposé d'effectuer dans le cadre du programme. Un paiement de transfert est une subvention, une contribution ou un autre paiement en contrepartie duquel aucun bien ni service n'est reçu et qui est accordé afin de faciliter la réalisation des objectifs d'un programme.

Les subventions, les contributions et les autres paiements de transfert diffèrent sur plusieurs points :

- i) les contributions sont des paiements conditionnels qui sont soumis à la vérification, tandis que les subventions ne le sont pas ;
- ii) les contributions exigent un accord entre le bénéficiaire et le ministre donateur qui détermine les conditions régissant leur versement, ce qui n'est pas le cas des subventions ;
- iii) les autres paiements de transfert sont des paiements effectués en vertu de la loi ou d'un accord qui prévoit habituellement l'utilisation d'une formule ou d'un calendrier d'exécution des paiements pour établir le montant annuel ;
- iv) le libellé employé dans le Budget des dépenses pour décrire une subvention a un caractère législatif, tandis que celui qui décrit une contribution ou un autre paiement de transfert n'est donné qu'à titre indicatif.

- e) *Crédits non budgétaires* – En regard de ce crédit, identifié par la lettre L, sont inscrits les postes non budgétaires tels que les prêts, les avances et les placements relatifs aux sociétés d'Etat ; et les prêts ou les avances consentis à des fins précises à d'autres gouvernements et à des organismes internationaux, ou à des personnes ou des sociétés du secteur privé.

- f) *Crédits spéciaux : Déficit des sociétés d'Etat et personnes juridiques distinctes* – Le concept d'un crédit par programme ne s'applique pas dans les situations où un crédit distinct est établi afin d'inscrire les sommes nécessaires pour effectuer un paiement à une société d'Etat ou couvrir les dépenses d'une personne juridique qui sont effectuées dans le cadre d'un programme plus important. Par personne juridique, on entend une entité de l'administration qui exerce ses activités en vertu d'une loi du Parlement et qui relève directement d'un ministre.

- g) *Crédits spéciaux : Crédits du Conseil du Trésor pour programmes financés par l'administration centrale* – Ces crédits permettent au Conseil du Trésor d'assumer ses responsabilités législatives relatives à la gestion des ressources financières, humaines et matérielles de l'administration fédérale, à cette fin, il doit disposer d'autorisations spéciales, lesquelles sont exposées ci-après.

- i) Crédit pour éventualités du gouvernement – Ce crédit permet de couvrir certaines dépenses diverses qui ne peuvent être prévues au moment de la préparation du Budget des dépenses, et d'absorber les coûts salariaux annuels, qui notamment découlent des conventions collectives qui entrent en vigueur durant l'année budgétaire et dépassent les sommes prévues aux crédits des ministères et organismes à l'égard de ces coûts.

- ii) Crédit pour initiatives pangouvernementales – Ce crédit augmente les crédits afin de soutenir la mise en œuvre d'initiatives de gestion stratégique entreprises dans la fonction publique du Canada, notamment l'initiative Service Canada, les programmes d'équité en matière d'emploi et la modernisation de la fonction de contrôleur.

- iii) Crédit pour les conventions collectives – Ce crédit augmente les crédits afin de fournir du financement pour les frais accrus de personnel au titre des conventions collectives conclues entre le Conseil du Trésor du Canada et les unités de négociations collectives représentant des fonctionnaires, ainsi que pour les conventions collectives signées par des employeurs distincts.

- iv) Assurances de la fonction publique – Ce crédit fournit les contributions de l'employeur aux primes d'assurance-maladie, d'assurance-salaire et d'assurance-vie, aux paiements des régimes d'assurance-maladie provinciaux, aux impôts provinciaux, aux pensions, aux régimes d'avantages sociaux et d'assurance pour les employés engagés sur place à l'extérieur du Canada et rend à certains employés leur part de la réduction des primes d'assurance-emploi.

## Présentation par portefeuille, ministère et organisme

Les programmes des ministères et organismes dont les ministères sont responsables ou comptables au Parlement ont été regroupés par portefeuille et représentent l'ensemble des portefeuilles. La présentation en ordre alphabétique des prévisions des portefeuilles forme le Budget principal des dépenses. Les ministères d'Etat, créés en application de la Loi de 1970 sur l'organisation du gouvernement, représentent une définition plus restreinte du terme « portefeuille », mais sont considérés comme des ministères pour les besoins de la présentation du Budget des dépenses.

Les prévisions de chaque portefeuille débutent par un tableau sommaire indiquant, pour chaque crédit ou poste législatif, le montant prévu dans le Budget principal des dépenses à l'égard de tous les programmes composant ce portefeuille. Ce tableau contient les libellés abrégés des crédits.

## Structure du Budget principal des dépenses

Le Budget des dépenses a pour objet de fournir au Parlement des renseignements sur les autorisations des dépenses budgétaires et des dépenses non budgétaires par le biais de projets de loi de crédits. Ces autorisations sont de deux types, à savoir les dépenses votées et les dépenses législatives. Les dépenses votées sont celles que le gouvernement doit faire approuver par le Parlement tous les ans au moyen d'une loi de crédits. Il s'agit des crédits que le gouvernement demande au Parlement de lui accorder par l'intermédiaire d'une loi de crédits. Le libellé de chaque crédit et l'autorisation de dépenses s'y rattachant sont présentés dans une annexe à cette loi. Le libellé et les montants établissent les conditions dans lesquelles ces dépenses peuvent être effectuées, une fois approuvées. Chaque projet de dépenses est inclus dans les crédits afin d'autoriser les dépenses nécessaires pour remplir les divers mandats qui ont été confiés à chaque ministre et qui sont précisés dans les lois que le Parlement a approuvées. Les autorisations des dépenses législatives sont celles que le Parlement a approuvées précédemment par le biais d'autres lois qui précisent l'objectif et les modalités des dépenses. Les dépenses législatives ne figurent dans le Budget des dépenses qu'à titre d'information.

Les éléments structurels de base de la **Partie II** sont les crédits et les postes législatifs, lesquels englobent l'ensemble des dépenses que le ministère ou l'organisme concerné se propose d'effectuer au titre d'un programme. On entend par programme un groupe d'activités ayant un objectif ou un ensemble d'objectifs commun.

En général, la structure des programmes et celle des crédits correspondent, en ce sens qu'ordinairement il n'y a qu'un crédit par programme. Le libellé d'un crédit et son montant figurent dans une loi de crédits qui précise l'autorisation et la limite des paiements imputables au crédit ; il ne s'agit pas d'un engagement à dépenser le montant total. Il y a toutefois des exceptions à la structure normale des crédits, lesquelles sont examinées ci-après.

On trouve dans le Budget des dépenses les types de crédits suivants :

a) *Crédits pour dépenses de programmes* – Ce crédit est utilisé lorsqu'il n'est pas nécessaire d'indiquer séparément le crédit pour « dépenses en capital » ou le crédit pour « subventions et contributions » parce que les dépenses proposées n'atteignent ni ne dépassent 5 millions de dollars. En pareil cas, toutes les dépenses de programmes sont imputées à un seul crédit.

b) *Crédits pour dépenses de fonctionnement* – On se sert de ce crédit lorsqu'il est nécessaire de disposer d'un crédit pour dépenses en capital ou d'un crédit pour subventions et contributions, voire des deux, c'est-à-dire lorsque les dépenses proposées sous l'une ou l'autre de ces rubriques atteignent ou dépassent 5 millions de dollars. Si ce n'est pas le cas, les dépenses en question sont incluses dans le crédit pour dépenses de programmes.

c) *Crédits pour dépenses en capital* – Ce type de crédit est employé lorsque les dépenses en capital d'un programme s'élèvent à 5 millions de dollars ou plus. Les dépenses en capital comprennent l'acquisition de terrains, de bâtiments et d'ouvrages (article courant de dépense n° 8) ainsi que l'acquisition de machines et de matériel (article courant de dépense n° 9) lorsqu'on prévoit que le montant du poste sera supérieur à \$10,000. Lorsqu'un ministre compte se servir de ses propres ressources humaines et matérielles ou retenir les services d'experts pour créer des immobilisations, il doit aussi inclure les dépenses prévues à cette fin dans le crédit pour dépenses en capital.

d) *Crédits pour subventions et contributions* – Ce crédit est utilisé lorsque les subventions et les contributions d'un programme totalisent 5 millions de dollars ou plus. L'inscription au Budget des dépenses d'un poste pour une subvention, une contribution ou un autre paiement de transfert n'entraîne aucune obligation de payer une partie ou la totalité du montant et n'accorde à un bénéficiaire éventuel aucun droit aux sommes prévues. La définition du mot « contribution » figurant dans le libellé du crédit est réputée englober les « autres paiements de transfert » puisqu'il s'agit de deux types de paiements semblables.

Autorisation de dépenser

Le Budget principal des dépenses expose les dépenses budgétaires et non budgétaires. Les dépenses budgétaires incluent les frais de service de la dette, les dépenses de fonctionnement et de capital, les paiements de transfert et les subventions aux autres paliers de gouvernement, à des organisations et à des particuliers, et les paiements aux sociétés d'État. Les dépenses non budgétaires (prêts, placements et avances) sont des dépenses qui correspondent à des modifications de la valeur des actifs financiers du gouvernement du Canada.

Autorisation des dépenses budgétaires

Ce budget principal des dépenses appuie la demande que le gouvernement a présentée pour obtenir du Parlement l'autorisation de dépenser 50,2 milliards de dollars au titre des autorisations de programme en vertu desquelles le Parlement doit approuver annuellement les limites de dépenses. Le reste des dépenses, soit 105,5 milliards de dollars ou 68 p. 100 du total, est affecté à des dépenses législatives. Les chiffres ne sont fournis qu'à titre d'information.

Autorisation des dépenses non budgétaires

Dans le Budget principal des dépenses de 2000–2001, il y a une augmentation nette prévue de 410 millions de dollars au chapitre de la valeur des prêts, des investissements et des avances. Les autorisations des dépenses non budgétaires votées, qui sont indiquées dans le présent budget des dépenses, s'élèvent à 31 millions de dollars. Le reste, soit 379 millions de dollars, est conforme à une législation habilitante.

Les dépenses législatives sont celles qui sont autorisées par le Parlement au moyen d'une législation habilitante. Une ventilation plus détaillée de ces autorisations par ministère et organisme est présentée à la Partie II du Budget principal des dépenses.

## Aperçu du Plan de dépenses

Le Budget fédéral du 28 février 2000 du ministre des Finances fait état de dépenses prévues de 158 milliards de dollars, dont 116 milliards de dollars sont imputables aux dépenses de programmes et 42 milliards aux frais de la dette publique.

### Budget principal des dépenses

Le Budget principal des dépenses de 2000-2001 présente des autorisations de dépenses budgétaires de 155,7 milliards de dollars. Cela représente plus de 98 p. 100 du plan des dépenses du Budget fédéral. Le budget principal des dépenses se distingue du plan des dépenses présenté dans le Budget fédéral de maintes façons :

- Le Budget des dépenses ne fait pas état des fonds qui, tout en faisant partie du plan des dépenses, sont réservés à différentes éventualités ou se rapportent à de nouvelles initiatives qui doivent être approuvées par le Parlement grâce à une législation ou qui doivent être planifiées et élaborées d'avantage avant qu'une autorisation de dépenser ne soit demandée au Parlement. Le gouvernement demandera une autorisation de dépenser pour de tels postes par une loi distincte ou par l'intermédiaire du Budget supplémentaire des dépenses qui sera déposé au Parlement au cours de l'exercice 2000-2001.

- Une provision est établie à même le plan de dépenses du Budget fédéral afin de permettre la réévaluation de l'actif et du passif du gouvernement. Cette provision rend possible la prise en compte des variations de la valeur des créances et des placements ainsi que le rajustement du passif en fonction des indemnités de départ et de la rémunération de vacances accumulées des employés ainsi que d'autres programmes législatifs. Le Budget principal des dépenses n'inclut pas de telles provisions.

- Les crédits votés inscrits au Budget des dépenses constituent une limite juridique sur le montant qu'un ministre peut dépenser. Par conséquent, il y a souvent un écart entre cette limite et le montant réellement dépensé; cette différence représente une autorisation de dépenses non utilisée. Certaines différences sont inévitables pour maintes raisons, comme les retards dans la réalisation de projets de construction causés par la mauvaise température ou la livraison tardive de biens ou de services commandés. Et d'autres différences traduisent des décisions prises par la direction. Les prévisions de dépenses, énoncées dans le Budget fédéral, tiennent compte de ces différences prévues.

## Partie I

### Plan de dépenses du gouvernement

Chaque année, le gouvernement établit son Budget des dépenses, qui présente l'information à l'appui des autorisations de dépenser demandées au Parlement pour l'affectation des fonds publics. Ces demandes d'autorisations sont présentées officiellement au moyen d'un projet de loi de crédits déposé au Parlement. Le Budget des dépenses, qui est déposé à la Chambre des communes par la présidente du Conseil du Trésor, comporte trois parties :

**Partie I – Le Plan de dépenses du gouvernement** présente un aperçu des dépenses fédérales et résume les rapports entre les principaux éléments du Budget principal des dépenses et le Plan de dépenses (qui figure dans le budget).

**Partie II – Le Budget principal des dépenses** étaye directement la *Loi de crédits*. Le Budget principal des dépenses énonce les autorisations de dépenser (crédits) et les sommes à inclure dans les projets de loi de crédits que le Parlement doit adopter afin que le gouvernement puisse mettre en application ses plans de dépenses. Les Parties I et II du Budget des dépenses sont déposées simultanément le 1<sup>er</sup> mars ou avant.

**Partie III – Le Plan de dépenses du ministère** est divisé en deux documents :

- 1) **Les rapports sur les plans et les priorités (RPP)** sont des plans de dépenses établis par chaque ministère et organisme (à l'exception des sociétés d'État). Ces rapports présentent des renseignements plus détaillés au niveau des secteurs d'activité et portent également sur les objectifs, les initiatives et les résultats prévus; il y est fait également mention des besoins connexes en ressources pour une période de trois ans. Les RPP contiennent également des données sur les besoins en ressources humaines, les grands projets d'immobilisations, les subventions et contributions, et les coûts nets des programmes. Ils sont déposés au Parlement par la présidente du Conseil du Trésor au nom des ministres responsables pour les ministères et organismes désignés aux annexes I, I.1 et II de la *Loi sur la gestion des finances publiques*. Ces documents doivent être déposés au plus tard le 31 mars, pour renvoi aux comités qui font ensuite rapport à la Chambre des communes conformément au paragraphe 81(4) du Règlement.

- 2) **Les rapports ministériels sur le rendement (RMR)** rendent compte des réalisations de chaque ministère et organisme en fonction des attentes prévues en matière de rendement qui sont indiquées dans leur RPP. Ces rapports sur le rendement, qui portent sur la dernière année financière achevée, sont déposés au Parlement en autonome par la présidente du Conseil du Trésor au nom des ministres responsables pour les ministères et organismes désignés aux annexes I, I.1 et II de la *Loi sur la gestion des finances publiques*.

Le Budget des dépenses, de même que le budget du ministre des Finances, sont le reflet de la planification budgétaire annuelle de l'État et de ses priorités en matière d'affectation des ressources. Ces documents, auxquels viennent s'ajouter par la suite les Comptes publics et les rapports ministériels sur le rendement, aident le Parlement à s'assurer que le gouvernement est dûment comptable de l'affectation et de la gestion des fonds publics.
